b. Appointment of External Auditors

As stated in Section 1 of Article VII of the Company's By-Laws, "At the regular stockholders' meeting the external auditor of the corporation for the ensuing year shall be appointed. The external auditor shall examine, verify and report on the earnings and expenses of the corporation." The stockholders representing the majority of the subscribed capital stock approves the appointment of external auditors.

Methods by which votes will be counted

All matters subject to vote, except in cases where the law provides otherwise, shall be decided by the plurality vote of stockholders present in person or by proxy and entitled to vote thereat, a quorum being present.

Unless required by law, or demanded by a stockholder present in person or by proxy at any meeting, and entitled to vote thereat, the vote of any question need not be by ballot. On a vote by ballot, each ballot shall be signed by the stockholder voting, or in his name by his proxy if there be such proxy, and shall state the number of shares voted by him. The external auditor of the Company, SGV & Co., will validate the ballots when voting is done by secret ballot. Likewise, SGV & Co. will count the number of hands raised when voting by show of hands is done.

As an investment holdings company, GT Capital generates its revenues from equity in net income of associates from the following component companies, namely: Metropolitan Bank and Trust Company ("Metrobank"), Global Business Power Corporation ("GBPC"), Toyota Motor Philippines Corporation ("TMPC") and Philippine AXA Life Insurance Corporation ("AXA Life"). The other revenue components including real estate sales, sales of goods and services, commission income, interest income on real estate sales, and rent income are generated from Federal Land, Inc. ("FLI"). As of December 31, 2011, FLI is the only component company that is consolidated in the financial statements of the Company.

The Company reported a net income attributable to shareholders of PhP3.3 billion for the year ended December 31, 2011, representing a 10.8% growth over the PhP3.0 billion recorded in the same period last year. The net income improvement was principally due to the increase in consolidated revenues by 26.3% to PhP8 billion from PhP6.3 billion a year ago. The major contributors to revenue growth came from equity in net income from associates, real estate sales, sale of goods and services, rent income, commission income and interest and other income.

GT Capital registered an equity in net income of associates of PhP3.6 billion in 2011, an increase of 21.0% from PhP2.9 billion in 2010. This increase was primarily attributable to the growth in equity in net earnings from Metrobank amounting to PhP795.1 million due to the higher net income registered for the year.

Real estate sales rose by 16.3% to PhP2.5 billion in 2011 from PhP2.2 billion in 2010 mainly due to a higher percentage of completion from ongoing FLI high end and middle market development projects.

Sale of goods and services increased by 18.6% to PhP764 million in 2011from PhP645 million in 2010 primarily due to the increase in the sale of petroleum and petroleum products at the Blue Wave Malls arising from higher volumes and increased prices. The higher volumes were primarily the result of the increased vehicle traffic in and around the Mall of Asia.

Commission income more than doubled and increased by 103.8% to PhP96 million in 2011 from PhP47 million in 2010. The increase was primarily due to sales commissions earned from units owned by Federal Land Orix Corporation at the Grand Midori project.

Rent income rose by 20.2% to PhP238 million in 2011 from PhP198 million in 2010. The increase was primarily due to higher occupancy and increased rental rates at both of the Blue Wave Malls resulting from the full year recognition of rent from a call center anchor tenant that began its tenancy in May 2010 as well as the acquisition of one (1) floor in the GT Tower International building in November 2010 which FLI leased out.

Interest and other income, comprising interest income on real estate sales, interest income and other income more than doubled and increased by 156.4% to PhP787 million in 2011 from PhP307 million in 2010. The improvement was due to the following: (1) reimbursement of interest expense from option money granted to affiliates for land purchases of FLI amounting to PhP337.1 million; (2) substantial increase in money market placements due to the corporate notes proceeds by GT Capital in the last quarter of 2010 and by FLI in the first quarter of 2011; and (3) higher accumulation of interest income arising from various buyers of FLI projects.

Cost of real estate sales increased by 13.8% to PhP1.6 billion in 2011 from PhP1.4 billion in 2010 chiefly due to an increase in real estate sales.

Cost of goods and services increased by 21.4% to PhP709 million in 2011 from PhP585 million in 2010 due to the increase in the volume of petroleum and petroleum products sold at the Blue Wave Malls as well as higher costs incurred for the purchase of petroleum products.

General and administrative expenses increased by 24.2% to PhP1.1 billion in 2011 from PhP893 million in 2010. A significant portion of the increase was the rise in commission expense due to higher sales, administrative and management fees, salaries and wages (as a result of an overall increase in head count and general wage increases due to higher sales), professional fees, and advertising and promotions for the greater number of new projects launched by FLI in 2011, amounting to PhP54.2 million, PhP49.4 million, PhP44.7 million, PhP37.4 million and PhP32.9 million, respectively.

Interest expense rose by 251.1% to PhP990 million in 2011 from PhP282 million in 2010 primarily due to the increase in loans availed in 2011 by FLI for land bank acquisition and by the Company to fund its equity investments in GBPC.

Provision for income tax more doubled and increased by 112% to PhP148 million in 2011 from PhP70 million in 2010 due to the substantial increase in taxable income during the year.

As a result of the foregoing, GT Capital's net income increased by 11% to PhP3.4 billion in 2011 from PhP3.1 billion in 2010.

The major changes in the balance sheet items from December 31, 2010 to December 31, 2011 are as follows:

Total assets of GT Capital increased by 36.6% or PhP18.8 billion; from PhP51.3 billion as of December 31, 2010 to PhP70.1 billion as of December 31, 2011. Total liabilities also increased by 68.9% or PhP13.4 billion;

from PhP19.5 billion to PhP32.9 billion. Total equities also increased by 16.8% or PhP5.3 billion; from PhP31.8 billion to PhP37.1 billion.

Cash and cash equivalents decreased by 85.2% or PhP2.6 billion due a loan provided to a third party.

Receivables increased substantially by 313.6% or PhP3.7 billion. This was mostly attributed to increases in loans receivable (PhP2.6 billion); installment contracts receivable, (PhP536.0 million); and advances to contractors and suppliers (PhP410.6 million) of FLI.

Inventories consisting of condominium units held for sale, land for development, materials and supplies and gasoline retail and petroleum products increased by 43.7% or PhP3.4 billion mainly due to an increase in real estate properties for development.

Due from related parties increased by 68.3% or PhP380.7 million due to advances provided to various subsidiaries of FL1.

Prepayment and other current assets increased by 29.7% or PhP222.5 million due to the increase in creditable withholding taxes of PhP144.3 million, input value-added tax of PhP69.4 million arising from real estate sales.

Noncurrent installment contract receivables increased by 22.7% or PhP206 million as unit buyers availed of long term payment packages for equity build up offered by FLI.

Long-term cash investment from FLI amounted to PhP2.4 billion in 2011 representing cash investment with a local bank in exchange for a loan obtained by an affiliate.

Deposits from FLI amounted to PhP4.1 billion in 2011. This deposits pertains to option money granted by a third party for the exclusive rights for three (3) years to either (1) to purchase the property; (2) to purchase shares of stock of the third party which own the property; (3) to develop the property as developer in joint venture with the third party; or (4) to undertake a combination of any of the foregoing, as may be agreed upon by the parties.

Investment and advances increased by 22.5% or PhP7 billion due to: (1) the exercise of stock rights and additional subscription of shares amounting to PhP2.6 billion in Metrobank; (2) entered into a Subscription Agreement with GBPC for a total consideration of PhP3.4 billion; and (3) increased subscription in AXA Life amounting to PhP14.6 million.

Property and equipment decreased by 8.1% or PhP34.5 million due to an increase in accumulated depreciation and amortization.

Deferred tax assets decreased by 42.9% or PhP3.1 million due to a decrease in accrued expenses and unearned income, principally.

Other noncurrent assets increased by 19.1% or PhP18 million due to the increase in rental and other deposits for leased offices and deposits for set-up of services required by utility companies of PhP44 million, which was offset by a decrease in AFS financial assets of PhP17.6 million and a decrease in deferred charges and guaranteed deposits of PhP8.9 million.

Accounts and other payables increased by 136.2% or PhP2.6 billion mainly due to the increase in trade payables pertaining to billings received from contractors and construction costs incurred by FLI.

Short-term loans payable increased by 6.5% or PhP466.5 million due to an increase in working capital requirements by FLI and GT Capital.

Customer deposits increased by 9.8% or PhP41 million due to an increase in cash payments arising from reservation sales generated by FLI.

Due to related parties increased by 25.5% or PhP82 million arising from FLI intercompany advances.

Other current liabilities increased by 141.7% or PhP34.1 million mainly due to the increase in withholding taxes payable from PhP11.2 million to PhP39.3 million.

Pension liabilities increased by 16.7% or PhP3.7 million chiefly due to an increase in unfunded obligations.

Long-term loans payable increased by 117.8% or PhP10.6 billion, arising from loan availments of GT Capital and FLI.

Deferred tax liabilities increased by 1,057.1% or PhP74 million due to an increase in deferred tax liabilities principally capitalized borrowing cost and excess of book basis over tax basis of deferred gross profit.

Other noncurrent liabilities increased by 18.9% or PhP10 million due to increase in finance lease obligation amounting to PhP11.9 million and in unearned rental income amounting to PhP13.9 million; which were offset by a decrease in refundable and other deposits amounting to PhP15.5 million.

Retained earnings increased by 45.1% or PhP2.4 billion due to an increase in total comprehensive income of PhP3.3 billion which was offset by the dividends declaration of PhP564.0 million and acquisition of subsidiary under common control of PhP336.0 million.

Other comprehensive income increased by PhP2.9 billion due to net unrealized gain on AFS securities of associates amounting to PhP2.8 billion and translation adjustment of PhP133.1 million.

Expansion Plans/Prospects for the Future

1. Further strengthen GT Capital's leadership position across existing businesses

In each of its existing businesses, GT Capital intends to further strengthen its market position by targeted strategies and investments that leverage its existing expertise, market insights, partnerships, and brand value and customer recognition:

- At Metrobank, asset growth and demand deposit growth will be key strategies in the near term. Coming off of a five year "clean up" period whereby Metrobank was able to significantly increase its NPL coverage ratio, Metrobank is turning its focus to growing its loan portfolio in the middle market and consumer banking segments. In addition, Metrobank intends to expand its current account and savings account balances through more efficient supply chain coverage and cash management products.
- At FLI, sustained strong growth in residential development activity based on FLI's high-quality land bank and industry-leading expertise and brand recognition shall be complemented by a

broader market footprint (across middle-income and high-end segments) and an increasing portfolio of commercial properties generating recurring income.

- At GBPC, ongoing capacity optimization through additional long-term off-take agreements will be complemented by new growth projects across the Visayas and Luzon, involving both conventional fuels such as coal and oil, and renewable energy projects such as hydropower.
- At TMPC, the recent capacity expansion at the TMPC manufacturing plant together with continued introductions of new imported completely build-up units, further improvements to the dealer network and best-in-class customer service are intended to maintain and further expand TMPC's clear market leadership.
- At AXA Life, the market-leading bancassurance distribution will be further enhanced while investing in additional distribution channels, continued product innovation and targeting of new customer groups such as high net worth individuals.
- 2. Seek profitable growth opportunities in other key domestic industries via proven partnership model

GT Capital's management is focused on identifying and addressing long-term profitable business opportunities in key sectors of the economy. These include sectors where GT Capital companies are already present, such as property development and power generation. For example, FLI intends to capitalize on the significant future growth expected in the BPO sector by providing innovative commercial real estate solutions in key locations to potential BPO customers. In addition, GBPC is currently exploring both greenfield and brownfield power generation projects, including those in the renewable energy sector such as hydroelectric. Beyond its existing business interests, GT Capital is also actively considering and evaluating new business initiatives in sectors that complement GT Capital's existing portfolio and where GT Capital will be able to contribute relevant insights, expertise and resources. Where appropriate value-enhancing business initiatives exist, GT Capital will seek to expand on its successful partnership model with recognized global industry leaders.

3. Consolidate GT Capital's ownership of the GT Capital companies

GT Capital Holdings is the primary vehicle for the holding and management of the various business interests of the Ty family in the Philippines. Subject to applicable laws and regulations and the conformity of its joint venture partners, GT Capital intends to acquire, over time, additional interests in current GT Capital companies, or in other companies controlled by the Ty family. Such consolidation would be consistent with GT Capital's active management approach to its portfolio and may allow an even more integrated approach among the GT Capital companies.

4. Further optimized synergy creation among the GT Capital companies

GT Capital's management intends to continuously seek and realize synergies among the GT Capital companies in areas including strategy, fund deployment, human resources and sharing of common IT and service platforms in order to further enhance cost efficiencies, competitive strengths and market positions across the group. Furthermore, there exist significant revenue synergies as many products and services offered by GT Capital are attractive to a common consumer target group and stand to benefit from cross-selling. For example, Metrobank's large depositor base represents a significant opportunity for the cross-selling of other GT Capital companies' products through coordinated efforts. In addition, mortgage products can be offered to potential purchasers of FLI condominium units, and the same target demographic may also be interested in automotive products (including lease financing) or life insurance-linked investment products. GT Capital aims to maximize such synergies from both existing and future business initiatives.

The Company reported a net income attributable to shareholders of PhP3.0 billion for the year ended December 31, 2010, representing a 37.5% growth over the PhP2.2 billion recorded in the same period last year. The increase was principally due to the upsurge in consolidated revenues by 46% to PhP6.3 billion from PhP4.3 billion a year ago. The improvement in revenues came from equity in net income from associates, real estate sales, sale of goods and services, rent income, and commission income.

GT Capital registered an equity in net income of associates of PhP2.9 billion in 2010, an increase of 41.1% from PhP2.1 billion in 2009. This increase was primarily attributable to the increase in equity earnings from Metrobank and TMPC amounting to PhP470.7 million and PhP360.0 million, respectively.

Real estate sales rose by 88.2% to PhP2.2 billion in 2010 from PhP1.1 billion in 2009. The increase was mainly due to an increase in the percentage of completion from ongoing FLI high and middle market development projects.

Sale of goods and services increased by 10.4% to PhP644.7 million in 2010 from PhP584.2 million in 2009. The increase was primarily due to an increase in the sale of petroleum and petroleum products at the Blue Wave Malls caused by higher volumes and increased prices.

Commission income arising from commissions earned in selling units of Federal Land Orix Corporation amounted to PhP47.1 million in 2010.

Rent income increased by 11.9% to PhP198.0 million in 2010, from PhP176.9 million in 2009. The increase was primarily due to the net effect of: (1) higher occupancy and increased rental rates at the Blue Wave Malls; (2) the acquisition of two (2) floors in GT Tower International for lease; and (3) office and commercial space rented out at the Blue Wave Mall to a call center in 2009, with 2010 being the first full year of revenue recognition from the call center tenant.

Interest and other income, comprising interest income on real estate sales, interest income and other income decreased by 7% to PhP307.4 million in 2010 from PhP330.7 million in 2009 arising from lower accumulation of interest income from certain FLI projects and lower management fees.

Cost of real estate sales increased by 114.4% to PhP1.4 billion in 2010 from PhP636.7 million in 2009 due to the increase in real estate sales.

Cost of goods and services increased by 17.6% to PhP584.6 million in 2010 from PhP497.6 million in 2009. The increase was primarily a result of an increase in the volume of petroleum sold at the Blue Wave Malls as well as higher prices paid for petroleum purchases due to increased traffic in the areas around the malls.

General and administrative expenses increased by 18.3% to PhP893.3 million in 2010 from PhP755.3 million in 2009. A significant portion of the increase was due to an increase in professional fees, commission expense, advertising and publicity and taxes and licenses, primarily as a result of the upsurge in business activities in 2010, amounting to PhP44.3 million, PhP31.1 million, PhP21.5 million and PhP21.1 million respectively.

Interest expense increased by 65.9% to PhP281.9 million in 2010 from PhP169.9 million in 2009. The significant increase was primarily due to the increase in loans availed by GT Capital.

Provision for income tax increased by 18.0% to PhP70.2 million in 2010 from PhP59.3 million in 2009 due to an increase in taxable income for the year.

As a result of the foregoing, GT Capital's net income increased by 40.8% to PhP3.1 billion in 2010 from PhP2.2 billion in 2009.

The major changes in the balance sheet items from January 1, 2010 as re-stated as compared to December 31, 2010 are as follows:

Total assets of GT Capital increased by 39.6% or PhP14.6 billion; from PhP36.7 billion as of January 1, 2010 to PhP51.3 billion as of December 31, 2010. Total liabilities also increased by 133.5% or PhP11.1 billion from PhP8.3 billion to P19.5 billion. Total equity also increased by 12.1% or PhP3.4 billion from PhP28.4 billion to PhP31.8 billion.

Cash and cash equivalents increased by PhP2.9 billion due to drawdown of a corporate notes issue by GT Capital in November of said year.

Receivables increased by 55.8% or PhP421 million. This was attributed to increases in installment contracts receivable, trade receivables, advances to officers and employees, accrued commission income, rent income, interest receivable, claims on late payments and other non-trade receivables.

Inventories consisting of condominium units held for sale, land for development, materials and supplies and gasoline retail and petroleum products increased by 13.9% or PhP961.4 million mainly due to an increase in real estate properties for development.

Due from related parties decreased by 36% or PhP314.1 million due to collections received from various subsidiaries of FLI.

Prepayment and other current assets increased by 33.4% or PhP188.9 million as the increases in tax of PhP217.8 million, prepaid expense of PhP25.9 million and other current assets of PhP47.7 million was offset by the decrease in input value-added tax of PhP102.5 million arising from real estate sales.

Noncurrent installment contract receivables more than doubled and increased by 219.5% or PhP625 million as unit buyers availed of long term payment packages for equity build up offered by FLI.

Investment and advances increased by 36.7% or PhP8.4 billion due to the advances made to GBPC (PhP4.0 billion); and purchase of additional shares in Metrobank and AXA Life, (PhP4.4 billion).

Investment properties increased by 35.7% or PhP1.4 billion due to additional land purchases by FLI.

Property and equipment increased by 15.5% or PhP57.9 million due to an increase in fixed assets.

Deferred tax assets increased by 755.0% or PhP5.9 million due to an increase in deferred tax assets principally excess of tax basis over book basis of deferred gross profit and accrued expenses.

Accounts and other payables increased by 239.2% or PhP1.4 billion mainly due to the increase in trade payables pertaining to billings received from contractors and construction costs incurred by FLI.

Short-term loans payable increased by 68.7% or PhP2.9 billion due to an increase in loans availed by GT Capital and FLI to fund its working capital requirements.

Customer deposits decreased by 32.2% or PhP198.4 million due to a decrease in cash payments from reservation sales generated by FLI.

Due to related parties decreased by 35.9% or PhP180 million due to payments made by various FLI subsidiaries.

Other current liabilities decreased by 18.9% or PhP5.6 million mainly due to a decrease in withholding taxes payable, which was offset by an increase in other payables.

The increase in long-term loans payable by PhP7.3 billion originated from a corporate notes issue and secured term loan availed by GT Capital to fund equity infusion for GBPC.

Liabilities on purchased land are payables to various real estate property sellers. Under the terms of the agreement executed by FLI covering the purchase of certain real asset properties, the titles of the subject properties shall be transferred to FLI only upon full payment of the real estate loans. As of December 31, 2010, the current and non-current portion of the liabilities on this purchased land amounted to PhP119 million and PhP398 million, respectively. In 2010, FLI has capitalized interest expense on liabilities on purchase land to "Inventories" account amounting to PhP32.7 million. During the year, the Group paid in full the remaining balance to property sellers.

Deferred tax liabilities decreased by 80.1% or PhP28.0 million arising from deferred tax liabilities principally capitalized borrowing cost and excess of book basis over tax basis of deferred gross profit.

Other noncurrent liabilities increased by 38.0% or PhP14.4 million mainly because of the increase in refundable and other deposits, unearned rental income and other noncurrent liabilities.

Retained earnings increased by 87.0% or PhP2.5 billion due to an increase in total comprehensive income of PhP3.0 billion which was offset by the cash dividends of PhP500.0 million.

Other comprehensive income increased by 72.1% or PhP233 million due to an increase in net income, offset by a decrease in net unrealized gain on AFS securities of associates and decrease in translation adjustment.

A.iv Brief Description of the General Nature and Scope of the Company's Business and Its Subsidiaries

The Company is a major Philippine conglomerate with interests in market-leading businesses across banking, real estate development, power generation, automotive and life insurance. GT Capital is the primary vehicle for the holding and management of the diversified business interests of the Ty family in the Philippines. The Company's business management, investment decisions and future business development are and will be firmly rooted in its corporate values of integrity, competence, respect, entrepreneurial spirit and commitment to value creation.

GT Capital's current portfolio of businesses is well-positioned to benefit from broad-based growth in the Philippine economy, and domestic consumption in particular. The current portfolio comprises directly held interests in the following component companies:

Banking - GT Capital conducts banking services through its 25.1% interest in Metrobank, a universal bank that offers corporate and commercial banking products and services throughout the Philippines. As of December 31, 2011, Metrobank was the second largest Philippine bank by asset size, net loans and receivables and total deposits, with total assets of PhP958.4 billion, net loans and receivables of PhP457.4 billion and total deposits of PhP681 billion. Metrobank has been listed on the Philippine Stock Exchange since 1981, and as of December 31, 2011 was the third largest Philippine bank by market capitalization (PhP143.5 billion). As of the same date, the Metrobank Group's Tier 1 and total adequacy ratios were 13.7% and 17.4%, respectively.

Real estate development - GT Capital conducts its real estate development business through its 100.0% interest in its fully consolidated subsidiary FLI, which develops residential and commercial projects. On May 3, 2012, the Company executed a Deed of Absolute Sale with various selling shareholders of FLI to acquire the remaining 20% equity stake in FLI for an aggregate consideration of PhP2.7 billion. The consideration was based on a premium above book value as of December 31, 2011. The acquisition increases the direct holdings of GT Capital from 80% to 100%. Following a successful consolidation process, FLI is the sole Philippine real estate development company of the Ty family. FLI is currently executing a comprehensive growth plan that aims to fully capitalize on the Ty family companies' 40-year track record in real estate and FLI's high-quality land bank and brand recognition. In 2011, FLI recorded reservation sales of 2,168 residential units with a total sales value of PhP9.1 billion (an increase of 114% compared to 2010 in terms of value). As of December 31, 2011, FLI had nineteen (19) ongoing residential projects at various stages of completion, with a total number of 7,473 units. FLI's land bank as of December 31, 2011 comprised 100.8 hectares of land.

Power generation - GT Capital conducts its power generation business through its 39.0% direct ownership interest in GBPC, a holding company that, through its subsidiaries, is a leading independent power producer in the Visayas Region, with a combined gross dependable capacity of 627 MW (480 MW attributable to GBPC, net of minority interests in its subsidiaries). On May 2, 2012, the Company exercised its option to acquire an additional 4.6% of GBPC's outstanding capital stock at a fixed price of PhP35.00 per share. GT Capital is currently in discussions with a third-party for the purchase of additional GBPC Shares. It is expected that these discussions will result in the increase in the direct holdings of GT Capital in GBPC up to 51% by the end of 2012. Panay Energy Development Corporation and Cebu Energy Development Corporation, GBPC's two largest power generation subsidiaries which own power plants with a combined installed capacity of 410 MW, only began commercial operations during the first quarter of 2011. The financial year ending December 31, 2012 is expected to be the first year of full contribution by these plants. On May 24, 2012, the Company disbursed an initial PhP504 million as its pro-rata share in an equity call for GBPC upon its stockholders. The equity call funded GBPC's downpayment on the Engineering Procurement and Construction and initial expenses of the Toledo Expansion Project. GBPC is actively considering further expansion options across the Philippines.

Automotive - GT Capital conducts its automotive business through its 21.0% interest in TMPC. TMPC is engaged in the manufacture, importation and wholesale distribution of Toyota brand motor vehicles in the Philippines, and is also engaged in the sale of motor vehicle parts and accessories both within the Philippines and through exports. TMPC is also engaged in the distribution of Lexus brand motor vehicles in the Philippines. Every year since 2002, Toyota has been the top selling brand for both passenger cars and

commercial vehicles in the Philippines, and since 1989, TMPC has been number one in total sales in 21 out of 23 years. In March 31, 2012, TMPC achieved a market share of 38.0% of total vehicle sales in the Philippines, according to data from the Chamber of Automotive Manufacturers of the Philippines ("CAMPI") and the Association of Vehicle Importers and Distributions ("AVID"). As the clear market leader in a key consumption sector and as exclusive manufacturer, importer and wholesale distributor in the Philippines of the No.1 global automotive brand (based on Interbrand 2011 and WPP 2011 studies), TMPC is ideally positioned to capitalize on the strong projected growth of the domestic automotive market.

Insurance - GT Capital conducts its insurance business through its 25.3% interest in AXA Life, which offers personal and group insurance products in the Philippines, including life insurance and investment-linked insurance products. AXA Life is a joint venture between the AXA Group, one of the world's largest insurance groups, and the Metrobank Group. AXA Life was first in first year premium and single premium of variable life insurance in the Philippines and is the third largest insurance company in terms of total net premium income of PhP8.3 billion as of December 31, 2010. In 2011, the 'AXA' brand was the top insurance brand in the world according to Interbrand.

A.vii Corporate Governance

The Company adopted its Manual on Corporate Governance (the "Governance Manual") on December 2, 2011. The policy of corporate governance is based on the Governance Manual. The Governance Manual lays down the principles of good corporate governance in the entire organization. The Governance Manual provides that it is the Board's responsibility to initiate compliance with the principles of good corporate governance, to foster long-term success and to secure the Company's sustained competitiveness in a manner consistent with its fiduciary responsibility.

The Company's By-laws and Manual on Corporate Governance (the "Governance Manual") provide that the Board shall have at least two independent directors. The Company espouses the definition of independence pursuant to the Securities Regulation Code. The Company considers as an independent director one who, except for his director's fees and shareholdings, is independent of management and free from any business or other relationship which, or could reasonably be perceived to, materially interfere with his exercise of independent judgment in carrying out his responsibilities as a Director of GT Capital Holdings.

The Governance Manual embodies the Company's policies on disclosure and transparency, and mandates the conduct of communication and training programs on corporate governance. The Governance Manual further provides for the rights of all shareholders and the protection of the interests of minority stockholders. Commission of any violation of the Governance Manual is punishable by a penalty ranging from reprimand to dismissal, depending on the frequency of commission as well as the gravity thereof.

The Board has constituted four committees to effectively oversee the Company's operations: (i) the Audit Committee; (ii) the Nominations Committee; (iii) the Compensation Committee; and (iv) the Corporate Governance Committee.

GT CAPITAL HOLDINGS, INC. AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Corporate Information

GT Capital Holdings, Inc. (the Parent Company) was organized and registered with the Philippine Securities and Exchange Commission (SEC) on July 26, 2007. The primary purpose of the Parent Company is to invest in, purchase, or otherwise acquire and own, hold, use, sell, assign, transfer, lease, mortgage, exchange, develop or otherwise dispose of real property of every kind and description, including shares of stocks, bonds, debentures, notes, evidences of indebtedness, and other securities or obligations of any corporation or corporations, associations, domestic or foreign, and to possess and exercise in respect thereof all the rights, powers and privileges of ownership, including all voting powers of any stock so owned. The ultimate parent is Grand Titan Capital Holdings, Inc.

The Parent Company owns 80% of Federal Land, Inc. (Fed Land) and has significant shareholdings in Metropolitan Bank & Trust Co. (MBTC), Toyota Motor Philippines, Inc. (Toyota) and Philippine AXA Life Insurance Corp. (Phil AXA) (see Note 8).

Group Activities

The Parent Company and Fed Land Group are collectively referred herein as the "Group". The Parent Company, holding company of Fed Land Group, is engaged in investing, purchasing and holding shares of stock, notes and other securities and obligations. The principal business interests of Fed Land Group are real estate development and leasing and sell properties and act as a marketing agent for and in behalf of any real estate development company or companies.

The Fed Land Group is also engaged in:

- a) the business of trading of goods such as petroleum, non-fuel products on wholesale or retail basis;
- b) maintaining a petroleum service station and;
- c) food and restaurant service.

The registered office address of the Parent Company is at 43rd Floor, GT Tower International, Ayala Avenue corner H.V. de la Costa St., Makati City.

The accompanying consolidated financial statements were authorized for issue by the Board of Directors (BOD) on February 17, 2012.

2. Summary of Significant Accounting Policies

Basis of Preparation

The accompanying consolidated financial statements of the Group have been prepared using the historical cost basis. The Group's consolidated financial statements are presented in Philippine Peso (P), the Group's functional currency. Values are rounded to the nearest peso unless otherwise indicated.

Statement of Compliance

The consolidated financial statements of the Group have been prepared in compliance with Philippine Financial Reporting Standards (PFRS).

Basis of Consolidation

Basis of consolidation from January 1, 2010

The consolidated financial statements comprise the financial statements of the Group as at December 31, 2011, 2010 and January 1, 2010, and for the years then ended December 31, 2011, 2010 and 2009.

The consolidated financial statements comprise the financial statements of the Parent Company, consolidated financial statements of Fed Land Group and Group's share in the net assets of the associates plus cost of investment. The consolidated statement of financial position as of January 1, 2010, as presented herein, represents the retrospective restatement of items in the consolidated financial statements of Fed Land Group and was consequently consolidated to the Group's financial statements (see Note 19 and 28). The Group provides full set of notes for the consolidated statement financial position as of January 1, 2010, including the related notes that were affected by the restatement.

The subsidiary is fully consolidated from the date of acquisition, being the date on which the Group obtains control, and continues to be consolidated until the date when such control ceases. The financial statements of the subsidiary are prepared for the same reporting period as the Parent Company, using consistent accounting policies. All intra-group balances, transactions, unrealized gains and losses resulting from intra-group transactions and dividends are eliminated in full.

Non-controlling interests (NCI) represent the portion of profit or loss and net assets in a subsidiary not wholly owned and are presented separately in the consolidated statement of income, consolidated statements of comprehensive income, consolidated statements of changes in equity and within equity in the consolidated statements of financial position, separately from the Parent Company's equity.

Losses within a subsidiary are attributed to the NCI even if that results in a deficit balance.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- Derecognizes the assets (including goodwill) and liabilities of the subsidiary, the carrying amount of any NCI and the cumulative translation differences, recorded in equity.
- Recognizes the fair value of the consideration received, the fair value of any investment retained and any surplus or deficit in profit or loss.
- Reclassifies the parent's share of components previously recognized in other comprehensive income to profit or loss or retained earnings, as appropriate.

Basis of consolidation prior to January 1, 2010

Certain of the above-mentioned requirements were applied on a prospective basis. The following differences, however, are carried forward in certain instances from the previous basis of consolidation:

- Acquisitions of non-controlling interests, prior to January 1, 2010, were accounted for using the parent entity extension method, whereby, the difference between the consideration and the book value of the share of the net assets acquired were recognized in goodwill.
- Losses incurred by the Group were attributed to the non-controlling interest until the balance was reduced to nil. Any further excess losses were attributed to the parent, unless the non-controlling interest had a binding obligation to cover these. Losses prior to January 1, 2010 were not reallocated between NCI and the parent shareholders.
- Upon loss of control, the Group accounted for the investment retained at its proportionate share of net asset value at the date control was lost. The carrying values of such investments at January 1, 2010 have not been restated.

The consolidated financial statements include the financial statements of the Parent Company and the following domestic subsidiaries of Fed Land:

b - Merged with HCAI in 2010 and SEC approved the change of name in December 23, 2010

c - Effective ownership in 2010 and 2009 was the effect of uniting of interest method

TLPMC

On April 27, 2011, the SEC approved the Articles of Incorporation and by Laws of TLPMC, a wholly owned subsidiary of Fed Land for a total subscription of P0.50 million. TLPMC started its operations in May 2011.

CRDC

On June 23, 2011, CRDC issued its remaining unissued capital stock to Fed Land consisting of 375,000 common shares with ₱100 par value share for ₱37.50 million. As a result, the Group obtained a 60.64% interest through Fed Land's 75.8% direct interest of CRDC after the issuance. The Group accounted the business combination under common control using uniting of interest method (see Note 28).

HLRC

In 2011, the Group acquired effective interest holdings of 80% in HLRC, a wholly owned subsidiary of Fed Land, from affiliated companies for a total consideration of #420.00 million. Such transaction involving business combination under common control was accounted for using uniting of interest method (see Note 28).

FBRI

FBRI is 51.66% owned by Fed Land and was consolidated to Fed Land Group. Effective ownership of the Parent Company over FBRI through Fed Land is 41.33%.

BLRDC

In 2011, Fed Land and MHC entered into a Deed of Assignment and Subscription Agreement under a joint venture arrangement with ORIX Risingsun Properties II, Inc. (Orix) (see Note 31).

On January 25, 2012, the SEC approved the change in corporate name of MHC from Morano Holdings Corporation to Bonifacio Landmark Realty and Development Corporation (BLRDC).

Combinations of Entities Under Common Control

Business combination of entities under common control is accounted for using the uniting of interest method. The combined entities accounted for by the uniting of interests method reports results of operations for the period in which the combination occurs as though the entities had been combined as of the beginning of the period. Financial statements of the separate entities presented for prior years are also restated on a combined basis to provide comparative information. The effects of intercompany transactions on current assets, current liabilities, revenues, and cost of sales for the periods presented and on retained earnings at the beginning of the periods presented are eliminated to the extent possible.

Under the uniting of interest method, the acquirer accounts for the combination as follows:

- the assets and liabilities of the acquire are consolidated using the existing carrying values instead of fair values;
- intangible assets and contingent liabilities are recognized only to the extent that they were recognized by the acquire in accordance with applicable PRFS;
- no amount is recognized as goodwill.
- any non-controlling interest is measured as a proportionate share of the book values of the related assets and liabilities; and
- comparative amounts are restated as if the combination had taken place at the beginning of the earliest comparative period presented.

The acquiree's equity are included in the opening balances of the equity as a restatement and are presented as "Effect of uniting of interest" in the consolidated statement of changes in equity. Cash consideration transferred on acquisition of a subsidiary under common control is deducted in the "Retained earnings" at the time of business combination.

Changes in Accounting Policies

The accounting policies adopted are consistent with those of the previous financial year except for the following new and amended PFRSs and Philippine Interpretations which were adopted as of January 1, 2011. Adoption of these changes in PFRS did not have any significant effect on the Group's consolidated financial statements.

• PAS 24, Related Party Transactions (Amendment)

PAS 24 clarifies the definitions of a related party. The new definitions emphasize a symmetrical view of related party relationships and clarify the circumstances in which persons and key management personnel affect related party relationships of an entity. In addition, the amendment introduces an exemption from the general related party disclosure requirements for transactions with government and entities that are controlled, jointly controlled or significantly influenced by the same government as the reporting entity. The adoption of the amendment did not have any impact on the financial position or performance of the Group.

• PAS 32, Financial Instruments: Presentation (Amendment)

The amendment alters the definition of a financial liability in PAS 32 to enable entities to classify rights issues and certain options or warrants as equity instruments. The amendment is applicable if the rights are given pro rata to all of the existing owners of the same class of an entity's non-derivative equity instruments, to acquire a fixed number of the entity's own equity instruments for a fixed amount in any currency. The amendment has had no effect on the financial position or performance of the Group because the Group does not have these type of instruments.

• Philippine Interpretation IFRIC 14, Prepayments of a Minimum Funding Requirement (Amendment) The amendment removes an unintended consequence when an entity is subject to minimum funding requirements and makes an early payment of contributions to cover such requirements. The amendment permits a prepayment of future service cost by the entity to be recognized as a pension asset. The Group is not subject to minimum funding requirements in the Philippines, therefore the amendment of the interpretation has no effect on the financial position nor performance of the

Group.

Improvements to PFRSs

Improvements to PFRSs, an omnibus of amendments to standards, deal primarily with a view to removing inconsistencies and clarifying wording. There are separate transitional provisions for each standard. The adoption of the following amendments did not have any impact on the consolidated financial position or performance of the Group.

Improvements to PFRS 2010

• PFRS 3, *Business Combinations*: The measurement options available for non-controlling interest (NCI) were amended. Only components of NCI that constitute a present ownership interest that entitles their holder to a proportionate share of the entity's net assets in the event of liquidation should be measured at either fair value or at the present ownership instruments' proportionate share of the acquiree's identifiable net assets. All other components are to be measured at their acquisition date fair value.

The amendments to PFRS 3 are effective for annual periods beginning on or after July 1, 2011. The Group, however, adopted these as of January 1, 2011 and changed its accounting policy accordingly as the amendment was issued to eliminate unintended consequences that may arise from the adoption of PFRS 3.

- PFRS 7, *Financial Instruments- Disclosures*: The amendment was intended to simplify the disclosures provided by reducing the volume of disclosures around collateral held and improving disclosures by requiring qualitative information to put the quantitative information in context.
- PAS 1, Presentation of Financial Statements: The amendment clarifies that an entity may present an analysis of each component of other comprehensive income maybe either in the statement of changes in equity or in the notes to the financial statements.

Other amendments resulting from the 2010 Improvements to PFRSs to the following standards did not have any impact on the accounting policies, consolidated financial position or performance of the Group.

- PFRS 3, Business Combinations (Contingent consideration arising from business combination prior to adoption of PFRS 3 (as revised in 2008))
- PFRS 3, Business Combinations (Un-replaced and voluntarily replaced share-based payment awards)
- PAS 27, Consolidated and Separate Financial Statements
- PAS 34, Interim Financial Statements

The following interpretation and amendments to interpretations did not have any impact on the accounting policies, financial position or performance of the Group:

- Philippine Interpretation IFRIC 13, Customer Loyalty Programmes (determining the fair value of award credits)
- Philippine Interpretation IFRIC 19, Extinguishing Financial Liabilities with Equity Instruments

New Accounting Standards, Interpretations and Amendments to Existing Standards Effective Subsequent to December 31, 2011

The Group will adopt the following standards and interpretations when these become effective. Except as otherwise indicated, the Group does not expect the adoption of these new and amended PFRS and Philippine Interpretations to have significant impact on its consolidated financial statements.

• PAS 1, Financial Statement Presentation - Presentation of Items of Other Comprehensive Income The amendments to PAS 1 change the grouping of items presented in OCI. Items that could be reclassified (or "recycled") to profit or loss at a future point in time (for example, upon derecognition or settlement) would be presented separately from items that will never be reclassified. The amendment affects presentation only and has therefore no impact on the Group's financial position or performance. The amendment becomes effective for annual periods beginning on or after July 1, 2012.

• PAS 12, Income Taxes - Recovery of Underlying Assets

The amendment clarified the determination of deferred tax on investment property measured at fair value. The amendment introduces a rebuttable presumption that deferred tax on investment property measured using the fair value model in PAS 40 should be determined on the basis that its carrying amount will be recovered through sale. Furthermore, it introduces the requirement that deferred tax on non-depreciable assets that are measured using the revaluation model in PAS 16 always be measured on a sale basis of the asset. The amendment becomes effective for annual periods beginning on or after January 1, 2012.

• PAS 19, Employee Benefits (Amendment)

Amendments to PAS 19 range from fundamental changes such as removing the corridor mechanism and the concept of expected returns on plan assets to simple clarifications and re-wording. The Group is currently assessing the impact of the amendment to PAS 19. The amendment becomes effective for annual periods beginning on or after January 1, 2013.

• PAS 27, Separate Financial Statements (as revised in 2011) As a consequence of the new PFRS 10, Consolidated Financial Statement and PFRS 12, Disclosure of Interests in Other Entities, what remains of PAS 27 is limited to accounting for subsidiaries, jointly controlled entities, and associates in separate financial statements. The Group does not present separate financial statements. The amendment becomes effective for annual periods beginning on or after January 1, 2013.

- PAS 28, Investments in Associates and Joint Ventures (as revised in 2011) As a consequence of the new PFRS 11, Joint Arrangements and PFRS 12, PAS 28 has been renamed PAS 28, Investments in Associates and Joint Ventures, and describes the application of the equity method to investments in joint ventures in addition to associates. The amendment becomes effective for annual periods beginning on or after January 1, 2013.
- PFRS 7, Financial Instruments: Disclosures Enhanced Derecognition Disclosure Requirements The amendment requires additional disclosure about financial assets that have been transferred but not derecognized to enable the user of the Group's financial statements to understand the relationship with those assets that have not been derecognized and their associated liabilities. In addition, the amendment requires disclosures about continuing involvement in derecognized assets to enable the user to evaluate the nature of, and risks associated with, the entity's continuing involvement in those derecognized assets. The amendment becomes effective for annual periods beginning on or after July 1, 2011. The amendment affects disclosures only and has no impact on the Group's financial position or performance.
- PFRS 7, Financial instruments: Disclosures Offsetting Financial Assets and Financial Liabilities These amendments require an entity to disclose information about rights of set-off and related arrangements (such as collateral agreements). The new disclosures are required for all recognized financial instruments that are set off in accordance with PAS 32. These disclosures also apply to recognized financial instruments that are subject to an enforceable master netting arrangement or 'similar agreement', irrespective of whether they are set-off in accordance with PAS 32. The amendments require entities to disclose, in a tabular format unless another format is more appropriate, the following minimum quantitative information. This is presented separately for financial assets and financial liabilities recognized at the end of the reporting period:
 - a) The gross amounts of those recognized financial assets and recognized financial liabilities;
 - b) The amounts that are set off in accordance with the criteria in PAS 32 when determining the net amounts presented in the statement of financial position;
 - c) The net amounts presented in the statement of financial position;
 - d) The amounts subject to an enforceable master netting arrangement or similar agreement that are not otherwise included in (b) above, including:
 - i. Amounts related to recognized financial instruments that do not meet some or all of the offsetting criteria in PAS 32; and
 - ii. Amounts related to financial collateral (including cash collateral); and

e) The net amount after deducting the amounts in (d) from the amounts in (c) above.

The amendments to PFRS 7 are to be retrospectively applied for annual periods beginning on or after January 1, 2013. The amendment affects disclosures only and has no impact on the Group's financial position or performance.

• PFRS 10, Consolidated Financial Statements

PFRS 10 replaces the portion of PAS 27, *Consolidated and Separate Financial Statements* that addresses the accounting for consolidated financial statements. It also includes the issues raised in SIC-12, *Consolidation - Special Purpose Entities*. PFRS 10 establishes a single control model that applies to all entities including special purpose entities. The changes introduced by PFRS 10 will require management to exercise significant judgment to determine which entities are controlled, and therefore, are required to be consolidated by a parent, compared with the requirements that were in PAS 27. This standard becomes effective for annual periods beginning on or after January 1, 2013.

• PFRS 11, Joint Arrangements

PFRS 11 replaces PAS 31, Interests in Joint Ventures and SIC-13, Jointly-controlled Entities - Nonmonetary Contributions by Venturers. PFRS 11 removes the option to account for jointly controlled entities (JCEs) using proportionate consolidation. Instead, JCEs that meet the definition of a joint venture must be accounted for using the equity method. The application of this new standard will not have significant impact to the financial position of the Group since the Group accounts its jointly controlled under equity method of accounting. This standard becomes effective for annual periods beginning on or after January 1, 2013.

PFRS 12, Disclosure of Involvement with Other Entities

PFRS 12 includes all of the disclosures that were previously in PAS 27 related to consolidated financial statements, as well as all of the disclosures that were previously included in PAS 31 and PAS 28. These disclosures relate to an entity's interests in subsidiaries, joint arrangements, associates and structured entities. A number of new disclosures are also required. This standard becomes effective for annual periods beginning on or after January 1, 2013.

• PFRS 13, Fair Value Measurement

PFRS 13 establishes a single source of guidance under PFRS for all fair value measurements. PFRS 13 does not change when an entity is required to use fair value, but rather provides guidance on how to measure fair value under PFRS when fair value is required or permitted. The Group is currently assessing the impact that this standard will have on the financial position and performance. This standard becomes effective for annual periods beginning on or after January 1, 2013.

• PFRS 9, Financial Instruments: Classification and Measurement

PFRS 9 as issued reflects the first phase on the replacement of PAS 39 and applies to classification and measurement of financial assets and financial liabilities as defined in PAS 39. The standard is effective for annual periods beginning on or after January 1, 2015. In subsequent phases, hedge accounting and impairment of financial assets will be addressed with the completion of this project expected on the first half of 2012. The adoption of the first phase of PFRS 9 will have an effect on the classification and measurement of the Group's financial assets, but will potentially have no impact on classification and measurements of financial liabilities. The Group will quantify the effect in conjunction with the other phases, when issued, to present a comprehensive picture.

• PAS 32, Financial Instruments: Presentation - Offsetting Financial Assets and Financial liabilities

These amendments to PAS 32 clarify the meaning of "currently has a legally enforceable right to setoff" and also clarify the application of the PAS 32 offsetting criteria to settlement systems (such as central clearing house systems) which apply gross settlement mechanisms that are not simultaneous. While the amendment is expected not to have any impact on the net assets of the Group, any changes in offsetting is expected to impact leverage ratios and regulatory capital requirements. The amendments to PAS 32 are to be retrospectively applied for annual periods beginning on or after January 1, 2014. The Group is currently assessing impact of the amendments to PAS 32.

• Philippine Interpretation IFRIC 15, Agreements for the Construction of Real Estate

The interpretation covers accounting for revenue and associated expenses by entities that undertake the construction of real estate directly or through subcontractors. The Interpretation requires that revenue on construction of real estate be recognized only upon completion, except when such contract qualifies as construction contract to be accounted for under PAS 11, *Construction Contracts*, or involves rendering of services in which case revenue is recognized based on stage of completion. Contracts involving provision of services with the construction materials and where the risks and reward of ownership are transferred to the buyer on a continuous basis will also be accounted for based on stage of completion. The SEC and the Financial Reporting Standards Council (FRSC) have deferred the effectivity of this interpretation until the final Revenue Standard is issued by International Accounting Standards Board (IASB) and an evaluation of the requirements and guidance of the final Revenue Standard in relation to the practices of the Philippine real estate industry is completed

The adoption of this Philippine Interpretation may significantly affect the determination of the revenue from real estate sales and the corresponding costs, and the related trade receivables, deferred tax liabilities and retained earnings accounts. The Group is in the process of quantifying the impact of adoption of this Interpretation.

Cash and Cash Equivalents

Cash includes cash on hand and in banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less from dates of placement and that are subject to an insignificant risk of changes in value.

Long Term Cash Investments

Long term cash investments are highly liquid investments that are subject to explicit time restriction under the provisions on the contracts.

Financial Instruments

Date of recognition

The Group recognizes a financial asset or a financial liability in the consolidated statement of financial position when it becomes a party to the contractual provisions of the instrument. Purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace are recognized on the trade date, which is the date when the group commits to purchase or sell assets.

Initial recognition of financial instruments

All financial assets are initially recognized at fair value. Except for financial assets and financial liabilities at fair value through profit or loss (FVPL), the initial measurement of financial assets and financial liabilities includes transaction costs. The Group classifies its financial assets in the following categories: securities at FVPL, held-to-maturity (HTM) investments, AFS financial assets, and loans and receivables. The Group classifies its financial liabilities at fair value through profit or loss or other financial liabilities. The classification depends on the purpose for which the investments were acquired and whether they are quoted in an active market. Management determines the classification of its investments at initial recognition and, where allowed and appropriate, re-evaluates such designation at every reporting date.

As of December 31, 2011, 2010 and 2009, the Group's financial assets are of the nature of loans and receivables and AFS financial assets while financial liabilities are of the nature of other financial liabilities.

Determination of fair value

The fair value for financial instruments traded in active markets at the reporting date is based on their quoted market price or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs. When current bid and ask prices are not available, the price of the most recent transaction provides evidence of the current fair value as long as there has not been a significant change in economic circumstances since the time of the transaction.

For all other financial instruments not listed in an active market, the fair value is determined by using appropriate valuation techniques. Valuation techniques include net present value techniques, comparison to similar instruments for which market observable prices exist, options pricing models, and other relevant valuation models.

Day 1 difference

Where the transaction price in a non-active market is different from the fair value from other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable markets, the Group recognizes the difference between the transaction price and fair value (a 'Day 1' difference) in consolidated statement of income under "Interest income" and "Interest expense" accounts unless it qualifies for recognition as some other type of asset or liability. In cases where use is made of data which is not observable, the difference between the transaction price and model value is only recognized in consolidated statement of income when the inputs become observable or when the instrument is derecognized. For each transaction, the Group determines the appropriate method of recognizing the 'Day 1' difference amount.

Loans and receivables

Loans and receivables are financial assets with fixed or determinable payments and fixed maturities that are not quoted in an active market. They are not entered into with the intention of immediate or shortterm resale and are not designated as AFS or financial assets at FVPL. This accounting policy relates to the consolidated statement of financial position captions "Cash and cash equivalents", "Receivables except for advances to contractors and suppliers", "Due from related parties" and "Long term cash investment" which in included in receivables account.

Receivables are recognized initially at fair value which normally pertains to the billable amount. After initial measurement, the loans and receivables are subsequently measured at amortized cost using the effective interest rate method, less allowance for impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. The amortization is included in the consolidated statement of income. The losses arising from impairment of such loans and receivables are recognized in the consolidated statement of income.

AFS financial assets

AFS financial assets are non-derivative financial assets those which are designated as such or do not qualify to be classified as designated as securities of FVPL, HTM investments, or loans and receivables.

They are purchased and held indefinitely, and may be sold in response to liquidity requirements or changes in market conditions. The Group's AFS financial assets pertain to unquoted equity securities included under the consolidated statement of financial position caption "Other noncurrent assets".

These are carried at cost less impairment and approximate fair value because fair value cannot be measured reliably due to the unpredictable nature of future cash flows and the lack of suitable methods of arriving at a reliable fair value.

Other financial liabilities

Other financial liabilities are financial liabilities not designated at FVPL where the substance of the contractual arrangement results in the Group having an obligation either to deliver cash or another financial asset to the holder, or to satisfy the obligation other than by the exchange of a fixed amount of cash. After initial measurement, other financial liabilities are subsequently measured at amortized cost using the effective interest rate method. Amortized cost is calculated by taking into account any discount or premium on the issue and fees that are an integral part of the effective interest rate.

This accounting policy applies primarily to the Group's accounts and other payables, loans payable, liabilities for purchased land, due to related parties and other obligations that meet the above definition (other than liabilities covered by other accounting standards, such as income tax payable).

Impairment of Financial Assets

The Group assesses at each reporting date whether there is objective evidence that a financial asset or a

group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the borrower or a group of borrowers is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Loans and receivables

For loans and receivables carried at amortized cost, the Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses for impairment. Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets being evaluated. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be recognized are not included in a collective assessment for impairment.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows (excluding future credit losses that have not been incurred). The carrying amount of the asset is reduced through use of an allowance account and the amount of loss is charged to the consolidated statement of income. Interest income continues to be recognized based on the original effective interest rate of the asset. Receivable, together with the associated allowance accounts, are written off when there is no realistic prospect of future recovery and all collateral has been realized. If, in a subsequent year, the amount of the estimated impairment loss decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. Any subsequent reversal of an impairment loss is recognized in the consolidated statement of income, to the extent that the carrying value of the asset does not exceed its amortized cost at the reversal date.

For the purpose of a collective evaluation of impairment, financial assets are grouped on the basis of such credit risk characteristics as past-due status and term.

Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently. The methodology and assumptions used for estimating future cash flows are reviewed regularly by the Group to reduce any differences between loss estimates and actual loss experience.

AFS financial assets

In case of equity investments classified as AFS financial assets, this would include a significant or prolonged decline in the fair value of the investments below its cost. Where there is evidence of impairment, the cumulative loss, measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in the consolidated statement of income is removed from the statement of changes in equity and recognized in consolidated comprehensive income. Impairment losses on equity investments are not reversed through profit or loss. Increases in fair value after impairment are recognized directly in other comprehensive income.

Derecognition of Financial Assets and Liabilities

Financial asset

A financial asset (or, where applicable a part of a financial asset or part of a group of financial assets) is derecognized when:

- a. the rights to receive cash flows from the asset have expired;
- b. the Group retains the right to receive cash flows from the asset, but has assumed as obligation to pay them in full without material delay to a third party under a "pass-through" arrangement; or
- c. the Group has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained the risk and rewards of the asset but has transferred the control of the asset.

Where the Group has transferred its rights to receive cash flows from an asset or has entered into a passthrough arrangement, and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Group's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Financial liability

A financial liability is derecognized when the obligation under the liability is discharged, cancelled, or has expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the consolidated statement of income.

Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the consolidated statement of financial position.

Inventories

Inventories consist of condominium units held for sale, gasoline retail and petroleum products, food and nonfood products that are available for sale in the Group's ordinary course of business and land and improvements and will be part of the Group's future real estate projects. These are carried at the lower of cost or net realizable value (NRV). NRV is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs to make the sale. Costs incurred in bringing each product to its present location and condition are accounted for as follows:

Real Estate Inventories

Property acquired are being developed or constructed for sale in the ordinary course of business, rather than to be held for rental or capital appreciation, is held as real estate inventory. Real estate inventories consist of land and improvements and condominium held for sale.

Land and improvements consists of properties that is held for future real estate projects and are carried at the lower of cost or NRV. Cost includes the acquisition cost of the land and those costs incurred for development and improvement of the properties. Upon commencement of real estate project, the subject land is transferred under "Condominium units held for sale".

Costs of condominium held for sale includes the carrying amount of the land transferred from "Land and improvements" at the commencement of its real estate projects and those costs incurred for construction, development and improvement of the properties, including capitalized borrowing costs.

Gasoline retail, petroleum products and chemicals

Cost is determined using first-in, first-out method. The costs of oil, petroleum products and chemicals include cost incurred for acquisition and freight charges.

Investments and Advances

This account includes advances for future stocks acquisition on investee companies. Investments and advances to in associates and jointly controlled entity are accounted for under the equity method of accounting. An associate is an entity in which the Group has significant influence and which is neither a subsidiary nor a joint venture of the Group. A joint venture is a contractual agreement whereby two or more parties undertake an economic activity that is subject to joint control.

An investment is accounted for using the equity method from the day it becomes an associate or jointly controlled entity. On acquisition of investment, the excess of the cost of investment over the investor's share in the net fair value of the investee's identifiable assets, liabilities and contingent liabilities is accounted for as goodwill and included in the carrying amount of the investment and neither amortized nor individually tested for impairment. Any excess of the investor's share of the net fair value of the associate's identifiable assets, liabilities over the cost of the investment is excluded from the carrying amount of the investment, and is instead included as income in the determination of the share in the earnings of the investees.

Under the equity method, the investments and advances to in associate and jointly controlled entity are carried in the consolidated statement of financial position at cost plus post-acquisition changes in the Group's share in the net assets of the investees, less any impairment in value.

The consolidated statement of income reflects the Group's share in the results of operations of the investee companies and the Group's share on movements in the investee's other comprehensive income are recognized directly in other comprehensive income in the consolidated financial statements. The Group's share on total comprehensive income of an associate is shown in the statement of income and statement of comprehensive income. This is the profit attributable to equity holders of the associate and, therefore, is profit after tax and non-controlling interests in subsidiaries of the associate.

Profits and losses resulting from transactions between the Group and the investee companies are eliminated to the extent of the interest in the investee companies and for unrealized losses to the extent that there is no evidence of impairment of the assets transferred. Dividends received are treated as a reduction of the accumulated earnings under "Investment in associate" account.

The Group discontinues applying the equity method when its investments in investee companies are reduced to zero. Accordingly, additional losses are not recognized unless the Group has guaranteed certain obligations of the associates or jointly controlled entity. When the investees subsequently report net income, the Group will resume applying the equity method but only after its share in the net income equals the share of net losses not recognized during the period the equity method was suspended.

Investment Properties

Investment properties consist of properties that are held to earn rentals and that are not occupied by the companies in the Group. Investment properties, except for land, are carried at cost less accumulated depreciation and amortization and any impairment in residual value. Land is carried at cost less any impairment in value.

Depreciation and amortization of investment properties are computed using the straight-line method over the estimated useful lives of the properties which is 25 years.

Investment properties are derecognized when either they have been disposed of, or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognized in profit or loss in the year of retirement or disposal.

Transfers are made to investment property when there is a change in use, evidenced by ending of owneroccupation, commencement of an operating lease to another party or ending of construction or development. Transfers are made from investment property when and only when there is a change in use, evidenced by commencement of owner-occupation or commencement of development with a view to sale. Transfers between investment property, owner-occupied property and inventories do not change the carrying amount of the property transferred and they do not change the cost of that property for measurement or disclosure purposes.

Property and Equipment

Property and equipment are stated at cost less accumulated depreciation and amortization and any impairment in value. The initial cost of property and equipment comprises its purchase price, including import duties, taxes and any directly attributable costs of bringing the property and equipment to its working condition and location for its intended use, including capitalized borrowing costs.

Construction-in-progress (CIP) is stated at cost. This includes cost of construction and other direct costs. CIP is not depreciated until such time that the relevant assets are completed and put into operational use.

Major repairs are capitalized as part of property and equipment only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the items can be measured reliably. All other repairs and maintenance are charged against operations as incurred.

Depreciation and amortization of property and equipment commences once the property and equipment are available for use and are calculated on the straight-line basis over the following estimated useful lives (EUL) of the property and equipment as follows:

	Years
Transportation equipment	5
Furniture, fixtures and equipment	5
	2 to 10 or lease term
Leasehold improvements	(whichever is shorter)
Machineries, tools and equipment	3 to 5
Building	20 to 40

The assets' residual values, EUL and depreciation and amortization method are reviewed periodically to ensure that the period and method of depreciation and amortization are consistent with the expected pattern of economic benefits from items of property and equipment.

Transfers are made from property and equipment, when there is a change in use, evidenced by ending of owner-occupation, and with a view of sale.

Franchise

Franchise fee is amortized over the franchise period which ranges from three (3) to five (5) years. Accumulated depreciation and amortization and provision for impairment losses, if any, are removed from the accounts and any resulting gain or loss is credited to or charged against current operations.

Software Costs

Costs related to software purchased by the Group for use in the operations are amortized on a straightline basis over a period of 3 years.

Costs that are directly associated with identifiable and unique software controlled by the Group and will generate economic benefits exceeding costs beyond one year, are recognized as intangible assets to be measured at cost less accumulated amortization and provision for impairment losses, if any. Expenditures which enhance or extend the performance of computer software programs beyond their original specifications are recognized as capital improvements and added to the original cost of the software.

Deposits

Deposits are stated at cost. Cost is the fair value of the asset given up at the date transfer to the affiliates. This account is treated as a real option money to purchase and develop a property that is held by a related party or an equity instrument to be issued upon exercise of option. The deposit granted to affiliates charges an interest and other related expenses in lieu of the time value in use of option money granted to the affiliates.

Impairment of Non-financial Assets

The Group assesses at each financial reporting date whether there is an indication that their nonfinancial assets (e.g. investments and advances to in associates and jointly controlled entity, investment properties, property and equipment, software costs and franchise and deposits), may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses of continuing operations are recognized in consolidated statement of income in those expense categories consistent with the function of the impaired asset.

An assessment is made at each financial reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in profit or loss unless the asset is carried at revalued amount, in which case, the reversal is treated as a revaluation increase. After such reversal the depreciation and amortization charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

This accounting policy applies primarily to the Group's property and equipment.

The following criteria are also applied in assessing impairment of specific assets:

Investments and advances

After application of the equity method, the Group determines whether it is necessary to recognize any additional impairment loss with respect to the Group's net investment in its associates and jointly controlled entity. The Group determines at each financial reporting date whether there is any objective evidence that the investments and advances to associates and jointly controlled entity is impaired.

If this is the case, the Group calculates the amount of impairment as being the difference between the fair value of the associate and jointly controlled entity and the carrying cost and recognizes the amount in the consolidated statement of income.

Intangible assets

Costs that are directly associated with identifiable and unique software controlled by the Group and will generate economic benefits exceeding costs beyond one year, are recognized as intangible assets to be measured at cost less accumulated amortization and accumulated impairment, if any. Otherwise, such costs are recognized as expense as incurred.

Expenditures which enhance or extend the performance of computer software programs beyond their original specifications are recognized as capital improvements and added to the original cost of the software. The Group's intangible assets consist of software costs and franchise. Intangible assets have an estimated useful life of 2 to 5 years. Where an indication of impairment exists, the carrying amount of computer system development costs is assessed and written down immediately to its recoverable amount.

Impairment of AFS financial assets

The Group treats AFS financial assets as impaired when there has been a significant or prolonged decline in the fair value below its cost or where other objective evidence of impairment exists. The determination of what is 'significant' or 'prolonged' requires judgment. The Group treats 'significant' generally as 20% or more of the original cost of investment and 'prolonged' as greater than 6 months for quoted equity securities. In addition, the Group evaluates other factors, including normal volatility in share price for quoted equities and the future cash flows and the discount factors for unquoted equities.

Customers' Deposits

The Group requires buyers of condominium units to pay a minimum percentage of the total selling price before the two parties enter into a sale transaction. The minimum percentage is on the basis of the level of buyer's commitment to pay and is part of the revenue recognition criteria. When the revenue recognition criteria are met, sales are, then, recognized and these deposits and downpayments will be applied against the related installment contracts receivable. In the event that the customer decides to terminate the purchase prior to recognition of sale, an amount equivalent to the cash surrender value of the deposit will be refunded to the buyer.

In relation to this, the customer's deposits consists of payment from buyers which have not reached the minimum required percentage and any excess of collections over the recognized receivables

Equity

The Group records common stocks at par value and additional paid-in capital in excess of the total contributions received over the aggregate par values of the equity share. Incremental costs incurred directly attributable to the issuance of new shares are deducted from proceeds.

Retained earnings represent(s) accumulated earnings (losses) of the Group less dividends declared, if any.

Acquisition of Non-controlling Interest in a Subsidiary

Acquisition of non-controlling interest is accounted for using the parent entity extension method, whereby the difference between the fair value of consideration given and the share in the net book value of the net assets acquired is recognized in equity. When the consideration is less than the net assets acquired, the difference is recognized as a gain in the consolidated statement of income. In an acquisition without consideration involved, the difference between the share of the non-controlling interests in the net assets at book value before and after the acquisition is treated as transaction between equity owners.

Revenue and Cost Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the amount of revenue can be reliably measured. The Group assesses its revenue arrangements against specific criteria in order to determine if it is acting as principal or agent. The Group has concluded that it is acting as principal in all of its revenue arrangements. The following specific recognition criteria must also be met before revenue is recognized:

Real estate sales

For real estate sales, the Group assesses whether it is probable that the economic benefits will flow to the Group when the sales prices are collectible. Collectibility of the sales price is demonstrated by the buyer's commitment to pay, which in turn is supported by substantial initial and continuing investments that give the buyer a stake in the property sufficient that the risk of loss through default motivates the buyer to honor its obligation to the seller. Collectibility is also assessed by considering factors such as the credit standing of the buyer, age and location of the property.

Real estate revenue and cost from completed projects is accounted for using the full accrual method. In accordance with Philippine Interpretations Committee (PIC) Q&A No. 2006-01, the percentage of completion method is used to recognize income from sales of projects where the Group has material obligations under the sales contract to complete the project after the property is sold, the equitable interest has been transferred to the buyer, construction is beyond preliminary stage (i.e., engineering, design work, construction contracts execution, site clearance and preparation, excavation and the building foundation are finished), and the costs incurred or to be incurred can be measured reliably. Under this method, revenue is recognized as the related obligations are fulfilled, measured principally on the basis of the estimated completion of a physical proportion of the contract work.

When the sale of real estate does not meet the requirements for revenue recognition, the sale is accounted under the deposit method until all the conditions are met. Under this method, revenue is not

recognized, the receivable from the buyer is not recorded and the cash received from buyers are presented under the "Customers' deposits" account in the "Liabilities" section of the consolidated statement of financial position. The related real estate inventories continue to be reported in the consolidated statement of financial position as "Inventories".

Cost of condominium units sold before the completion of the development is determined on the basis of the acquisition cost of the land plus its full development costs, which include estimated costs for future development works, as determined by the Group's in-house technical staff.

Sale of goods

Sale of goods is recognized from retail customers at the point of sale in the stores. This is measured at the fair value of the consideration received, excluding (or 'net of,' or 'reduced for') discounts, returns, rebates and sales taxes.

Management fees

Management fees from administrative, property management and other fees are recognized when services are rendered.

Commission income

Commission income is recognized by reference to the percentage of collection of the agreed sales price or depending on the term of the sale as provided under the marketing agreement.

Rental income

Rental income under noncancellable leases is recognized in the consolidated statement of income on a straight-line basis over the lease term and the terms of the lease, respectively, or based on a certain percentage of the gross revenue of the tenants, as provided under the terms of the lease contract.

Interest income

Interest is recognized as it accrues using the effective interest method.

Dividend income

Dividend income is recognized when the Group's right to receive the payment is established.

Other income

Other customer related fees such as penalties and surcharges are recognized as they accrue, taking into account the provisions of the related contract.

Expense Recognition

Commission expenses

Commissions paid to sales or marketing agents on the sale of pre-completed real estate units are deferred when recovery is reasonably expected and are charged to expense in the period in which the related revenue is recognized as earned. Accordingly, when the percentage of completion method is used, commissions are likewise charged to expense in the period the related revenue is recognized. These are recorded as "Prepaid expenses" under "Prepayments and other current assets" account.

General and administrative expenses

General and administrative expenses constitute costs of administering the business and are expensed as incurred.

Pension Costs

The Group has a funded, noncontributory defined benefit retirement plan, administered by trustees, covering their permanent employees.

Pension cost is actuarially determined using the projected unit credit method. This method reflects services rendered by employees up to the date of valuation and incorporates assumptions concerning employees' projected salaries. Actuarial valuations are conducted with sufficient regularity, with option to accelerate when significant changes to underlying assumptions occur. Pension cost includes current service cost, interest cost, expected return on any plan assets, actuarial gains and losses and the effect

of any curtailment or settlement.

The liability recognized in the consolidated statement of financial position in respect of the defined benefit pension plans is the present value of the defined benefit obligation at the financial reporting date less the fair value of the plan assets and less any actuarial gains or losses not recognized. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using risk-free interest rates that have terms to maturity approximating the terms of the related pension liability.

Actuarial gains and losses is recognized as income or expense if the cumulative unrecognized actuarial gains and losses at the end of the previous reporting period exceeded the greater of 10% of the present value of defined benefit obligation or 10% of the fair value of plan assets. These gains and losses are recognized over the expected average remaining working lives of the employees participating in the plans.

Income Tax

Current tax

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the financial reporting dates.

Deferred tax

Deferred tax is provided using the liability method on all temporary differences, with certain exceptions, at the financial reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are recognized for all deductible temporary differences, carryforward benefit of unused tax credits from excess minimum corporate income tax (MCIT) and net operating loss carryover (NOLCO), to the extent that it is probable that taxable income will be available against which the deductible temporary differences and carryforward benefit of unused tax credits from MCIT and NOLCO can be utilized. Deferred income tax, however, is not recognized when it arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting income nor taxable income.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable income will be available to allow all or part of the deferred tax assets to be utilized.

Deferred tax assets and liabilities are measured at the tax rate that is expected to apply to the period when the asset is realized or the liability is settled, based on tax rate and tax laws that have been enacted or substantively enacted at the reporting date.

Foreign Currency Transactions

The functional and presentation currency of the Group is Philippine Peso. Transactions denominated in foreign currency are recorded using the exchange rate prevailing at the date of the transactions. Monetary assets and liabilities denominated in foreign currencies are restated using the closing exchange rates prevailing at reporting date. Exchange gains or losses resulting from rate fluctuations upon actual settlement and from restatement at year-end are credited to or charged against current operations.

Segment Reporting

The Group's operating businesses are organized and managed separately according to the nature of the products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. Financial information on the Group's business segments is presented in Note 30.

Leases

Leases where the lessor retains substantially all the risks and benefits of the ownership of the asset are classified as operating leases. Fixed lease payments are recognized on a straight-line basis over the lease term. Variable rent is recognized as an income based on the terms of the lease contract.

Borrowing Costs

Borrowing costs are generally expensed as incurred. Interest and other financing costs incurred during the construction period on borrowings used to finance property development are capitalized as part of development costs. Capitalization of borrowing costs commences when the activities to prepare the asset are in progress and expenditures and borrowing costs are being incurred. Capitalization of borrowing costs ceases when substantially all the activities necessary to prepare the asset for its intended use or sale are complete. If the carrying amount of the asset exceeds its recoverable amount, an impairment loss is recorded. Capitalized borrowing cost is based on applicable weighted average borrowing rate.

Provisions

Provisions are recognized when the Group has: (a) a present obligation (legal or constructive) as a result of a past event; (b) it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and (c) a reliable estimate can be made of the amount of the obligation. Where the Group expects a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

Contingencies

Contingent liabilities are not recognized in the consolidated financial statements. These are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the consolidated financial statements but disclosed when an inflow of economic benefits is probable.

Events after Reporting Date

Post year-end events that provide additional information about the Group's position at the reporting date (adjusting events) are reflected in the consolidated financial statements. Post year-end events that are not adjusting events are disclosed in the notes to the consolidated financial statements when material.

3. Management's Judgments and Use of Estimates

The preparation of the consolidated financial statements in compliance with PFRS requires the Group's management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. The estimates and assumptions used in the accompanying consolidated financial statements are based upon management's evaluation of relevant facts and circumstances as of the date of the financial statements. Actual results could differ from such estimates.

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including future events that are believed to be reasonable under circumstances.

Judgments

In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on the amounts recognized in the consolidated financial statements:

Revenue and cost recognition

Selecting an appropriate revenue recognition method for a particular real estate sale transaction requires certain judgments based on, among others:

- Buyer's commitment on the sale which may be ascertained through the significance of the buyer's initial investment; and
- Stage of completion of the project.

Collectibility of the sales price

In determining whether the sales prices are collectible, the Group considers that initial and continuing investments by the buyer of about 10% would demonstrate the buyer's commitment to pay.

Operating lease commitments - the Group as lessee

The Group has entered into a lease contract with its related parties with respect to the parcels of land where its retail malls are located. The Group has determined that all significant risks and rewards of ownership of the leased property remains to the lessor since the leased property, together with the buildings thereon, and all permanent fixtures, will be returned to the lessor upon termination of the lease.

Operating lease commitment - the Group as lessor

The Group entered into commercial property leases on its retail mall, investment properties and certain units of its real estate projects to different parties for a specific amount depending on the lease contracts. The Group has determined that it retains all significant risks and rewards of ownership on the properties as the Group considered risks and rewards of ownership on the properties as the Group considered among others the length of the lease as compared with the estimated life of the assets.

A number of the Group's operating lease contracts are accounted for as noncancellable operating leases. In determining whether a lease contract is cancellable or not, the Group considered among others, the significance of the penalty, including the economic consequences to the lessee (see Note 27).

Finance lease commitments - Group as Lessee

The Group has entered into finance leases on certain parcel of land. The Group has determined, based on an evaluation of the terms and conditions of the arrangements, that the lessor transfers substantially all the risks and benefits incidental to ownership of the leased equipment to the Group thus, it recognized these leases as finance leases.

Impairment of AFS financial assets

The Group treats AFS financial assets as impaired when there has been a significant or prolonged decline or where other objective evidence of impairment exists. The determination of what is 'significant' or 'prolonged' requires judgment. The Group treats 'significant' generally as 20% or more and 'prolonged' as greater than six months for quoted equity securities. In addition, the Group evaluates other factors, including normal volatility in share price for quoted equities and the future cash flows and the discount factors for unquoted equities.

Financial assets not quoted in an active market

The Group classifies financial assets by evaluating, among others, whether the asset is quoted or not in an active market. Included in the evaluation on whether a financial asset is quoted in an active market is the determination on whether quoted prices are readily and regularly available, and whether those prices represent actual and regularly occurring market transactions on an arm's length basis.

Distinction between real estate inventories and investment properties

The Group determines whether a property will be classified as real estate inventories or investment properties. In making this judgment, the Group considers whether the property is held for sale in the ordinary course of business (real estate inventories) or which are held primarily to earn rental and capital appreciation and are not occupied substantially for use by, or in the operations of the Group (investment properties).

Distinction between investment properties and owner-occupied properties

The Group determines whether a property qualifies as investment property. In making its judgment, the Group considers whether the property generates cash flows largely independent of the other assets held by an entity. Owner-occupied properties generate cash flows that are attributable not only to property but also to the other assets used in the production or supply process.

Some properties comprise a portion that is held to earn rentals or for capital appreciation and another portion that is held for use in the production or supply of goods or services or for administrative purposes. If these portions cannot be sold separately as of financial reporting date, the property is accounted for as investment property only if an insignificant portion is held for use in the production or supply of goods or services or for administrative purposes. Judgment is applied in determining whether ancillary services are so significant that a property does not qualify as investment property. The Group considers each property separately in making its judgment.

Contingencies

The Group is currently involved in few legal proceedings. The estimate of the probable costs for the resolution of these claims has been developed in consultation with outside counsel handling the defense in these matters and is based upon an analysis of potential results. The Group currently does not believe that these proceedings will have a material effect on the Group's financial position. It is possible, however, that future results of operations could be materially affected by changes in the estimates or in the effectiveness of the strategies relating to these proceedings.

Management's Use of Estimates

The key assumptions concerning the future and other key sources of estimation and uncertainty at the financial reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Revenue recognition

The Group's revenue recognition policies require management to make use of estimates and assumptions that may affect the reported amounts of revenues and costs. The Group's revenue from real estate sales recognized based on the percentage of completion are measured principally on the basis of the estimated completion of a physical proportion of the contract work, and by reference to the actual costs incurred to date over the estimated total costs of the project. The carrying amount of installment contract receivable amounted to P1,924.21 million in December 31, 2011, P1,361.19 million in December 31, 2010, and P750.93 million in January 1, 2010 (see Note 5). The Group recognized real estate sales in 31, 2011, 2010, and 2009 amounting to P2,512.20 million, P2,160.70 million, and P1,148.00 million, respectively.

Estimating allowance for impairment losses

The Group reviews its loans and receivables at each reporting date to assess whether an allowance for impairment should be recorded in the consolidated statement of financial position and any changes thereto in profit or loss. In particular, judgment by management is required in the estimation of the amount and timing of future cash flows when determining the level of allowance required. Such estimates are based on assumptions about a number of factors. Actual results may also differ, resulting in future changes to the allowance.

The Group maintains allowance for impairment losses based on the result of the individual and collective assessment under PAS 39. Under the individual assessment, the Group is required to obtain the present value of estimated cash flows using the receivable's original effective interest rate. Impairment loss is determined as the difference between the receivable's carrying balance and the computed present value. The collective assessment would require the Group to group its receivables based on the credit risk characteristics (industry, customer type, customer location, past-due status and term) of the customers. Impairment loss is then determined based on historical loss experience of the receivables grouped per credit risk profile. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently. The methodology and assumptions used for the individual and collective assessments are based on management's judgment and estimate. Therefore, the amount and timing of recorded expense for any period would differ depending on the judgments and estimates made for the year.

Therefore, the amount and timing of recorded expense for any period would differ depending on the judgments and estimates made for the year. As of December 31, 2011 and 2010 and January 1, 2010, the carrying values of these assets are as follows:

		December 31	January 1,	
	2011	2010	2010	
Receivables (Note 6)	₽4,864,096,896	₽1,175,627,247	₽754,968,420	
Due from related parties	938,859,224	558,144,260	872,062,998	

Evaluating net realizable value of real estate inventories

The Group adjusts the cost of its real estate inventories to net realizable value based on its assessment of the recoverability of the inventories. In determining the recoverability of the inventories, management considers whether those inventories are damaged or if their selling prices have declined. Likewise, management also considers whether the estimated costs of completion or the estimated costs to be incurred to make the sale have increased. The amount and timing of recorded expense for any period would differ if different judgments were made or different estimates were utilized. The carrying value of the Group's inventories amounted to P11,338.37 million, P7,889.22 million, and P6,927.61 million as of December 31, 2011, 2010 and January 1, 2010, respectively (see Note 6).

Estimating useful lives of property and equipment, investment properties and intangibles assets

The Group estimated useful lives (EUL) of its property and equipment, investment properties, and intangibles assets based on the period over which the assets are expected to be available for use. The Group reviews annually the EUL of property and equipment, investment properties and intangible assets based on factors that include asset utilization, internal technical evaluation, and anticipated use of the assets. It is possible that future results of operations could be materially affected by changes in these estimates brought about by changes in the factors mentioned. A reduction in the EUL of property and equipment, investment properties and intangible assets assets would increase the recorded depreciation and amortization expense.

As of December 31, 2011, 2010 and January 1, 2010, the carrying values of property and equipment, investment property, software costs and franchise are as follow:

			January 1,
		December 31	2010
	2011	2010	(See Note 2)
Investment properties (Note 9)	₽5,227,423,530	₽5,299,217,182	₽3,906,242,718
Property and equipment (Note 10)	396,367,203	430,887,963	373,046,962
Software costs (Note 12)	8,425,386	8,386,285	13,840,392
Franchise (Note 12)	72,697	145,424	2,063,057

Evaluating asset impairment

The Group reviews investment properties, investments in and advances to associates and a jointly controlled entity, property and equipment, software costs and franchise. This includes considering certain indications of impairment such as significant changes in asset usage, significant decline in assets' market value, obsolescence or physical damage of an asset, plans in the real estate projects, significant underperformance relative to expected historical or projected future operating results and significant negative industry or economic trends.

As described in the accounting policy, the Group estimates the recoverable amount as the higher of the fair value less cost to sell and value in use. In determining the present value of estimated future cash flows expected to be generated from the continued use of the assets, the Group is required to make estimates and assumptions that may affect investments and advances to in associates and jointly controlled entity, property and equipment, software cost and franchise. The following table sets forth the carrying values of investment properties, investments and advances to in associates and jointly controlled entity, property and equipment, software costs and franchise as of December 31, 2011, 2010 and January 1, 2010:

			January 1,
		December 31	2010
	2011	2010	(See Note2)
Investments and advances to in			
associates and a joint venture			
(Note 8)	₽38,112,517,612	₽31,123,061,558	₽22,761,246,838
Property and equipment (Note 10)	396,367,203	430,887,963	373,046,962
Investment properties (Note 9)	5,227,423,530	5,299,217,182	3,906,242,718
Software (Note 12)	8,425,386	8,386,285	13,840,392
Franchise (Note 12)	72,697	145,424	2,063,057

Deferred tax assets

The Group reviews the carrying amounts of deferred taxes at each reporting date and reduces deferred tax assets to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilized. However, there is no assurance that the Group will generate sufficient taxable profit to allow all or part of deferred income tax assets to be utilized. The Group looks at its projected performance in assessing the sufficiency of future taxable income.

The Group's deferred tax asset amounted to P3.79 million, P6.75 million and P0.76 million as of December 31, 2011, 2010 and 2009, respectively. Unrecognized temporary differences pertaining to NOLCO, MCIT and unrealized foreign exchange loss amounted to P190.31 million and P0.02 million and P6.83 million, respectively (see Note 25).

Estimating pension and other retirement benefits

The determination of the obligation and cost of pension and other retirement benefits is dependent on the selection of certain assumptions used by actuaries in calculating such amounts. Those assumptions include are described in Note 24 to the consolidated statement of financial position and include among others, discount rates, expected returns on plan assets and rates of salary increase. While the Group believes that the assumptions are reasonable and appropriate, significant differences in actual experience or significant changes in assumptions materially affect retirement obligations.

As of December 31, 2011, 2010 and January 1, 2010, the present value of defined benefit obligations and unrecognized actuarial losses are as follows (see Note 24):

		December 31	January 1, 2010
-	2011	2010	(See Note2)
Present value of funded defined benefit obligations Unrecognized actuarial losses	₽94,019,346 (42,949,696)	₽78,287,581 (42,807,415)	₽51,699,062 (6,311,230)

Fair value of financial instruments

Where the fair values of financial assets and financial liabilities recorded in the consolidated statement of financial position cannot be derived from active markets, they are determined using internal valuation techniques using generally accepted market valuation models. The inputs to these models are taken from observable markets where possible, but where this is not feasible, estimates are used in establishing fair values. These estimates may include considerations of liquidity, volatility, and correlation (see Note 26).

4. Cash and Cash Equivalents

This account consists of:

		December 31	January 1,
	2011	2010	2010
Cash on hand and in banks	₽383,635,340	₽2,731,763,350	₽164,857,911
Cash equivalents	70,786,225	333,178,496	33,640,673
	₽454,421,565	₽3,064,941,846	₽198,498,584

Cash in banks earns interest at the prevailing bank deposit rates. Cash equivalents are made for varying periods of up to three months depending on the immediate cash requirements of the Group, and earn interest at the prevailing short-term investment rates ranging from 2.3% to 4.0% interest per annum.

Interest income from deposits and savings accounts of the Group amounted to ₽24.52 million, ₽9.81 million and ₽3.28 million in 2011, 2010 and 2009, respectively.

5. Receivables

This account consists of:

		December 31	January 1,
-	2011	2010	2010

Noninterest-bearing installment contracts receivables are collected over a period of one to ten years. The fair value upon initial recognition is derived using discounted cash model using the discount rate

ranging from 8% to 18% in December 31, 2011, 2010 and January 1, 2010. Interest income recognized from these receivables amounted to #195.92 million, #174.57 million, and #180.64 million in 2011, 2010 and 2009, respectively. Unamortized discount amounted to #424.14 million, #147.08 million, and # 114.18 million as of December 31, 2011, 2010 and January 1, 2010, respectively.

Movements in the unamortized discount as of December 31, 2011, 2010 and January 1, 2010 follow:

		December 31	January 1,
	2011	2010	2010

Advances to contractors and suppliers pertain to advances and initial payment for the purchase of construction materials and supplies and contractor services. These are recouped upon every progress billing payments and will be due and demandable upon breach of contract.

Trade receivables pertain to tenants' rentals already billed but not yet collected and their share in utilities (electricity, water and liquefied petroleum gas).

Accrued rent income and accrued commission pertain to commission and rent earned but not yet collected, with a 15- to 30- day term.

Advances to officers and employees pertain to cash advances for representation and entertainment and employee cash loans. Advances for representation and entertainment are liquidated within 30 days after incurrence of expense while employee cash loans are collected through salary deduction. Cash advances to agents pertain to mobilization funds granted to agents to finance their sales-related needs. These advances are subjected to liquidation within 30 days after the release of cash advance.

Other receivables pertain to the claims on late payments and other non trade receivables.

Loan receivable represents a short term loan granted by the Parent Company to a third party on December 27, 2011 amounting to P2.6 billion with fixed interest rate of 4.00% per annum.

As of December 31, 2011, 2010 and January 1, 2010, the Group's other receivables which are past due were provided with full allowance amounting to \$3.77 million, \$2.93 million, and \$1.69 million, respectively. The impairment loss pertains to individually impaired accounts. These are presented as gross amounts before directly deducting impairment allowance. No impairment losses resulted from performing collective impairment test.

The movement in the Group's allowance for impairment losses follows:

Advances to GBPC

As of December 31, 2011, investments and advances to in associates include deposits for future subscription (DFS) amounting to P3,397.12 million advanced by the Parent Company to GBPC in August 2010, net of P602.88 million refund of DFS in December 2011.

On December 9, 2011, the Parent Company and GBPC entered into a Subscription Agreement which provides that of the planned increase of P760.00 million in GBPC's authorized capital stock, the Parent Company shall subscribe to and purchase, and GBPC agrees to issue and sell, 117,067,800 shares with par value of P1.00 per share, for a total consideration of P3,397.12 million (see Note 31).

Investment in MBTC

In 2011, FMIC, a majority owned subsidiary of MBTC participated in a bond exchange transaction under the liability management exercise of the Philippine government. The SEC granted exemptive relief from the existing tainting rule on held-to-maturity (HTM) investment under Philippine Accounting Standard (PAS) 39, Financial Instruments: Recognition and Measurement while the Bangko Sentral ng Pilipinas (BSP) also provided the same exemption for prudential reporting to the participants. Following the exemption granted, the 2011 consolidated financial statements of MBTC have been prepared in compliance with Philippine GAAP. For the purpose of computing the Group's share in 2011 net income and other comprehensive income of MBTC, certain adjustments were made in MBTC's 2011 consolidated financial statements to comply with PFRS.

In January 2011, the Parent Company exercised its stock rights and subscribed for additional shares which aggregated to 52,201,070 million shares with a cost of **P**2.61 billion.

In October 2010, the Board of Directors of MBTC approved the entitlement to subscribe to one (1) share for every 9.557 common shares held by eligible shareholders as of December 20, 2010, which is the Record Date. The offer price is P50.00 per share and the offer period is from January 5 to 15, 2011. At the Record Date, the Parent Company held 478,000,000 shares, and had been entitled to 50,015,695 stock rights valued at P722.30 million. The fair value of stock rights was estimated at the date of entitlement using the Black-Scholes model. The inputs on the model included price history time period, and exercise price. With an assumption on the volatility of 40.96%, valuation resulted to an intrinsic value of P720.23 million and time value of P2.07 million for the stock rights.

As a result of stock rights issuance, the Parent Company owns 23.65% interest in MBTC as of December 31, 2010.

In December 2010, the Parent Company purchased 26.00 million shares of MBTC with a par value of P 20.00 per share for a total consideration of P1,822.00 million.

Investment in Phil AXA

In 2011 and 2010, the Parent Company agreed to increase its subscription in Phil AXA amounting to \$14.61 million and \$105.98 million, respectively.

On December 15, 2009, the BOD of Phil AXA authorized the declaration of 16% stock dividends or a total of P34.30 million (see Note 23).

On October 6, 2009, to comply with the capitalization requirement, the Insurance Commission granted the request of Phil AXA for the conversion of its contingency surplus into paid-up capital.

Disposal of an associate

In December 2010, Fed Land sold its interest in Cathay International Resources Corporation (CIRC) to a third party for a consideration of P142.22 million. The disposal of the investment resulted to a loss amounting to P0.45 million (see Note 23).

Certain parcels of land were transferred to the "Inventories" account with a carrying amount of P117.98 million, P9.12 million and P2.41 million as of December 31, 2011 and 2010 and January 1, 2010, respectively (see Note 6). The transferred properties are already intended for the construction of condominium units for sale.

In December 2010, the Fed Land acquired additional office space in GT Tower which is currently being leased out to third parties.

Various parcels of land are leased to several individuals and corporations. Some of the lease contracts provide, among others, that within a certain period from the expiration of the contracts, the lessee will have to demolish and remove any and all improvements or built within the leased properties. Otherwise, the lessor will cause the demolition and removal thereof and charge the cost to the lessee unless the lessor occupies and appropriates the same for its use and benefit. Rental income recognized from these properties amounted to P238.00 million, P197.99 million and P176.85 million in 2011, 2010 and 2009, respectively (see Note 27).

The depreciation of the investment properties amounting to P11.52 million, P9.14 million and P6.82 million in 2011, 2010 and 2009, respectively, is included in the "General and administrative expenses" account in the consolidated statements of income (see Note 22).

The aggregate fair value of the Group's investment properties amounted to P8.01 billion and P3.26 billion as of December 31, 2011 and 2010, respectively and P1.87 billion as of January 1, 2010. The fair value of the Group's investment properties has been determined based on valuations performed by Philippine Appraisal Company, Inc., an accredited independent appraiser. Philippine Appraisal Company, Inc. is an industry specialist in valuing these types of investment properties. The value of the land was estimated by using the Market Data Approach, a valuation approach that considers the sales, listings and other related market data within the vicinity of the subject properties and establishes a value estimate by processes involving comparison. Valuation of the Group's investment properties are done every three years with the latest valuation report issued in February 2012.

The additional office space pertains to the 20th floor of GT Tower International, which were acquired by the Group on December 14, 2010.

Construction-in-progress (CIP) amounting to P0.38 million, P0.18 million and P88.15 million was reclassified to leasehold improvements as of December 31, 2011, 2010 and January 1, 2010 and inventories amounting to P83.92 million and P4.22 million, respectively (see Note 6). There was no capitalized borrowing cost on CIP as of December 31, 2011 and 2010. These assets were not pledged as collateral for securing bank loans (see Note 14).

11. Deposits

Deposit represents option money to a related party for the exclusive rights for three years either (a) to purchase the property, (b) to purchase shares of stock of the third party which own the property, (c) to develop the property as developer in joint venture with third party or (d) to undertake a combination of any of the foregoing, as may be agreed upon by the parties.

Interest income on deposit represents reimbursement of interest expense from option money granted to affiliates amounting to #337.71 million (see Note 23).

Franchise fee pertains to the Group's operating rights for its fast food stores with estimated useful lives of three (3) to five (5) years.

The amortization of the franchise fee amounting to \$0.07 million, \$0.50 million and \$0.70 million in 2011, 2010 and 2009, respectively, is included in the "General and administrative expenses" account in the consolidated statements of income (see Note 22).

AFS financial assets are carried at cost due to the unpredictable nature of future cash flows and the lack of suitable valuation of arriving at a reliable fair value. The AFS financial assets are preferred shares of utility company issued to the Group as a consequence of its subscription to the electricity services of said utility company needed for the Group's real estate projects. The said preferred shares have no active market and the Group does not intend to dispose of these because these are directly related to the continuity of its business.

	₽19,600,000,000	₽9,000,000,000	₽1,638,891,076

The details of the obligation follow:

Loan from local banks has interest rates ranging from 3.09% to 9.50% lump sum with maturity within one year and interest payable quarterly in arrears.

Corporate Notes - Fed Land

On March 18, 2011, Fed Land entered into a Notes Facility Agreement with First Metro Corporation, Metropolitan Bank & Trust Company - Trust Banking Group and various Institutions whereby Fed Land will issue P6,600.00 million of fixed rate notes to finance projects, working capital and for general corporate purposes. The Notes is payable in five years with interest rate based on the latest PDST-F plus a spread of 85 basis points per annum. The Notes constitute direct, unconditional, unsubordinated and unsecured obligations, ranking *pari passu* with all other present and future direct, unconditional, unsubordinated and unsecured obligations.

Corporate Notes - Parent Company

On October 12, 2010, the BOD authorized the Parent Company to issue, offer, and sell peso-denominated fixed rate notes at a principal amount up to **P5.00** billion. In connection with this, a Notes Facility Agreement was entered by Parent Company with First Metro Investment Corporation (FMIC). Per indicative terms and conditions of the agreement, the notes were offered through a private placement and were issued at face value on November 10, 2010 with maturities of up to five (5) years with interest based on latest PDST-F rate plus a spread of 75 basis points per annum.

The agreements covering the above mentioned Corporate Notes provide for restrictions and requirements with respect to, among others, declaration or payment of cash dividends/retirement of shares (other than dividends payable solely in shares of its capital stock and cash dividends due on its then-outstanding preferred shares); making distribution on its share capital; purchase, redemption or acquisition of any share of stock; incurrence or assumption of indebtedness; sale or transfer and disposal of all or a substantial part of its capital assets; restrictions on use of funds; maintaining certain financial ratios; and entering into any partnership, merger, consolidation or reorganization. As of December 31, 2011, the Group is in compliance with the covenants as aforementioned.

Affiliated Bank Loan

This account consists of unsecured, partially secured and secured peso-denominated short-term borrowings (see Note 22) by the Group from a local bank with floating interest rates at 1.5% spread over benchmark 90-day PDST-R2 plus gross receipts tax. The interest rates ranges from 5.77% to 9.50% in 2010 and 5.77% to 7.00% in 2009.

In 2011, Fed Land also obtained both partially secured and fully secured peso-denominated loans with an aggregate amount of \$2,000.00 million from an affiliated local bank with interest at prevailing market rate of 3.75%, payable in lump sum after 5 years (see Note 23).

As of December 31, 2011, the Parent Company has outstanding both partially secured and fully secured peso-denominated loans with an aggregate amount of P7.091 billion from an affiliated local bank with interest at prevailing market rate ranging from 3.53% to 5.40%. This included a P4.00 billion fully secured loan to fund equity infusion for power-related projects, specifically in support of the construction of the 246 MW coal-fired plant (see note 23).

These loans were obtained primarily to fund the Parent Company's investing activities.

In 2009, the Parent Company also obtained from an affiliated local bank unsecured peso-denominated loans with interest at prevailing market rate of 5.36% with maturities of three (3) months.

Interest expense recognized in 2011, 2010 and 2009 amounted to ₱989.75 million, ₱281.92 million and ₱ 169.85 million, respectively.

In 2011, 2010 and 2009, the Group has capitalized interest expense amounting to P171.54 million, P 174.54 million and P155.86 million for loans specifically used to finance the Group's project construction. Said capitalized interest is added to "Condominium units held for sale" account and recognized as expense upon the sale of condominium units (see Note 6).

15. Customers' Deposits

The Group requires buyers of condominium units to pay a minimum percentage of the total selling price before the two parties enter into a sale transaction. In relation to this, the customers' deposits represent payment from buyers which have not reached the minimum required percentage. When the revenue recognition criteria are met, sales are recognized and these deposits and down payments will be applied against the related installment contracts receivable. In the event that the customer decides to terminate the purchase prior to recognition of sale, an amount equivalent to the repossessed value of deposit less charges and penalties incurred will be refunded to the buyer.

This account also includes excess of collections over the recognized receivables based on percentage of completion.

16. Liabilities on Purchased Land

Liabilities on purchased land are payables to various real estate property sellers. Under the terms of the agreements executed by the Group covering the purchase of certain real estate properties, the titles of the subject properties shall be transferred to the Group only upon full payment of the real estate loans. As of December 31, 2010, the current and non-current portion of the liabilities on this purchased land amounted to P118.99 million and P397.86 million, respectively. In 2010, the Group has capitalized interest expense on liabilities on purchase land to "Inventories" account amounting to P32.70 million, respectively.

During the year, the Group paid in full the remaining balance to property sellers.

	₽62,932,335	₽52,663,113	₽38,338,257

Refundable and other deposits consist mainly of tenants' rental deposit from operating lease contracts with terms ranging from 5 to 10 years (see Note 26). Rental deposits are obtained to secure faithful compliance of tenants' obligation under the lease contract and to answer for unpaid bills of lessees affecting the leased premises, any damage to the leased premises, and other similar costs. Rental deposits may also be applied for the unpaid rentals upon termination of the lease contract.

19. Equity

As of December 31, 2011, 2010 and January 1, 2010, this account consists of:

Common stock - ₱10 par value Authorized - 500,000,000 shares	
Issued and outstanding - 125,000,000 shares	₽1,250,000,000

Retained earnings

Retained earnings amounting to P7,169.82 million, P4,937.09 million and P2,518.65 million as of December 31, 2011, 2010 and 2009, respectively include the accumulated equity in undistributed net earnings of consolidated subsidiaries, associates and jointly controlled entities accounted for under equity method. The amounts are not available for dividends until declared by the subsidiaries, associates and the jointly controlled entities.

Retained earnings are further restricted for the payment of dividends to the extent of the cost of the common shares held in treasury.

Effect of uniting on HLRDC and CRDC

The net effect of uniting of interest on the acquisition of HLRDC and CRDC amounted to P104.26 million as of December 31. 2011. This represents the difference between the Fed Land's aggregate consideration transferred on the acquisition and the respective HLRDC and CRDC's equity as of December 31, 2010 attributable to parent and to non controlling interest as at the time of the combination (see Note 27):

Net asset (deficiency) of HLRDC and CRDC attributable to parent at the time of business combination:

		December 31
	2010	2009
HLRDC	₽442,944,672	₽360,275,850

CRDC	10,230,890	9,898,241
	₽120,967,058	₽99,967,203

The aggregate cost of investment of #420.00 million is presented as a reduction to the net assets pooled to the Group's financial statements at the time of combination for year ended December 31, 2011.

Consideration transferred on acquisition of subsidiary

The effect of uniting of interest on the acquisition of PCRDC, representing the difference between Fed Land's cost of investment amounted to P102.00 million.

Acquisition of Minority interest

In 2009, the Group's acquisition of an additional 4.47% interest in FBRI resulted to a difference between the acquisition cost and equivalent net asset acquired amounting to P4.83 million. This difference was treated as a transaction between equity owners.

Increase in Non-controlling interests of Subsidiary

Increase in non-controlling interest represents additional capital infusion to Fed Land from its noncontrolling interests for the subscription of issued shares amounted to P600.00 million and 2010, respectively, and a deposit for future stocks subscription of P400.00 million in 2009.

Dividend declaration

On August 5, 2011, the BOD of the Parent Company approved the declaration of cash dividends of P4.00 per share on the outstanding 125,000,000 shares of stock or a total of P500.00 million out of the retained earnings of the Parent Company to all stockholders of record as of August 31, 2011.

On April 8, 2010, the BOD of the Parent Company approved the declaration of cash dividends of P2.00 per share on its 125,000,000 outstanding shares or a total of P250.00 million, from the unappropriated retained earnings of the Parent Company to all stockholders of record as of March 25, 2010, payable not later than April 15, 2010.

23. Related Party Transactions

Parties are considered to be related if one party has the ability, directly, or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions and the parties are subject to common control or common significant influence. Related parties may be individuals or corporate entities.

The Group, in its regular conduct of its business, has entered into transactions with its associate and other related parties principally consisting of cash advances for reimbursement of expenses merger and acquisitions and capital infusion, leasing agreements, management agreements and dividends received from associates. Transactions with related parties are made at normal market prices.

As of December 31, 2011, 2010 and January 1, 2010, the Group has not made any provision for probable losses relating to amounts owed by related parties. This assessment is undertaken each financial year by examining the financial position of the related party and the market in which the related party operates.

The consolidated financial statements include the following amounts resulting from the above transactions with related parties:

Details of the transactions with affiliates are as follows:

Land for development

Certain parcels of land were acquired on February 2011 and March 2010 from an affiliated company and an affiliated local bank, respectively. These parcels of land were acquired at their fair market value at time of acquisition.

Operating advances

Due from and to related parties consist mostly of operating advances which are noninterest-bearing and due and demandable.

Long term cash investment

On April 13, 2011, Fed Land invested long-term cash investments with a local bank to secure a loan obtained by an affiliate amounting to P2,440.08 million. Fed Land recognized interest income from the assigned long term cash investment amounting to P40.08 million.

Deposit

Deposit pertains to option money granted by Fed Land to a related party for the exclusive rights over three years to either (a) to purchase the property, (b) to purchase shares of stock of the third party which own the property, (c) to develop the property as developer in joint venture with the third party or (d) to undertake a combination of any of the foregoing, as may be agreed upon by the parties (see Note 11). Fed Land recognized interest income amounting to P337.71 million representing reimbursement of interest expense incurred.

Investment property and property and equipment

On December 2010, certain condominium units in GT Tower International were purchased from a related party for a consideration amounting to P101.64 million (See Note 10).

Investment and advances

The Parent Company advanced P4.0 billion to GBPC in August 2010 as deposit for future stock subscription with equivalent interest of 21.04% (see Note 30). Out of the total advances, GBPC returned P602.88 million to the Parent Company in 2011.

Affiliated bank loans

The Group's loans payable to an affiliated commercial bank bears interest rates ranging from 3.75% to 4.5% per annum in 2011 and 6.52% to 6.78% per annum in 2010 and 2009, respectively.

Management fee

Management fee amounting to P36.83 million, P20.81 million and P42.92 for 2011, 2010 and 2009, pertains to the income received from a joint venture of Fed Land with Fed Land Orix Corporation (FLOC) and MBTC (see Note 20).

Lease Agreements

In 2011, the Fed Land also leased its mall to some of its associates and affiliates. The lease term ranged from 5 to 10 years. The rental income on these leases amounted to P10.03 million and P8.57 million for 2011 and 2010, respectively. (See Note 27).

* Excluding VAT remitted in advance amounting to P21.80 million as of December 31, 2010

The carrying amounts for cash and cash equivalents, due from related parties, accounts and other payables, loans payable and due to related parties approximate their fair values due to their short-term maturity.

Installment contracts receivable - The fair values of installment contracts receivable are based on the discounted value of future cash flows using the applicable rates for similar types of instruments. The discount rates used ranged from 8.00 to 12.00%, 3.91% to 8.27% and 5.38% to 7.40% as of December 31, 2011, 2010 and January 1, 2010, respectively.

AFS unquoted financial assets - These are carried at cost less allowance for impairment losses because fair value cannot be measured reliably due to lack of reliable estimates of future cash flows and discount rates necessary to calculate the fair value. The AFS financial assets at the cost are preferred shares of utility company issued to the Group as a consequence of its subscription to the electricity services of said utility company needed for the Group's real estate projects. The said preferred shares have no active market and the Group does not intend to dispose these because these are directly related to the continuity of its business.

Financial Risk Management and Objectives

The Group's principal financial instruments comprise cash and cash equivalents, receivables, due from related parties, AFS financial assets, accounts and other payable, due to/from related parties, and loans payable.

Exposure to credit, liquidity and foreign currency risks, interest rate arise in the normal course of the Group's business activities. The main objectives of the Group's financial risk management are as follows:

- to identify and monitor such risks on an ongoing basis;
- to minimize and mitigate such risks; and
- to provide a degree of certainty about costs.

The use of financial derivative instruments (if any) is solely for management of the Group's financial risk exposures. It is the Group's policy not to enter into derivative transactions for speculative purposes.

The Group's financing and treasury function operates as a centralized service for managing financial risks and activities as well as providing optimum investment yield and cost-efficient funding for the Group.

Credit risk

The Group's credit risks are primarily attributable to its financial assets. To manage credit risks, the Group maintains defined credit policies and monitors on a continuous basis its exposure to credit risks. Given the Group's diverse base of counterparties, it is not exposed to large concentrations of credit risk.

Financial assets comprised cash and cash equivalents, receivables, due from related parties and AFS financial assets. The Group adheres to fixed limits and guidelines in its dealings with counterparty banks and its investment in financial instruments. Bank limits are established on the basis of an internal rating system that principally covers the areas of liquidity, capital adequacy and financial stability. The rating system likewise makes use of available international credit ratings. Given the high credit standing of its accredited counterparty banks, management does not expect any of these financial institutions to fail in meeting their obligations.

In respect of installment receivables from the sale of properties, credit risk is managed primarily through credit reviews and an analysis of receivables on a continuous basis. The Group also undertakes supplemental credit review procedures for certain installment payment structures. Customer payments are facilitated through various collection modes including the use of post dated checks and auto-debit arrangements. Exposure to bad debts is not significant and the requirement for remedial procedures is minimal given the profile of buyers.

The table below shows the maximum exposure to credit risk for the components of the Group's statement of financial position.

The credit quality of the financial assets was determined as follows:

Cash and cash equivalents and Long term cash investment- based on the nature of the counterparty and the Group's internal rating system.

Receivables - high grade pertains to receivables that had no default in payment; medium grade pertains to receivables with a history of being 30 to 90 days past due; and low grade pertains to receivables with a history of being over 120 days past due.

AFS financial assets - the unquoted financial assets are unrated.

As of December 31, 2011, 2010 and January 1, 2010, the aging analysis of past due but not impaired financial assets presented per class, is as follows:

Liquidity risk

The Group monitors its cash flow position, debt maturity profile and overall liquidity position in assessing its exposure to liquidity risk. The Group maintains a level of cash and cash equivalents deemed sufficient to finance operations and to mitigate the effects of fluctuation in cash flows. Accordingly, its loan maturity profile is regularly reviewed to ensure availability of funding through an adequate amount of credit facilities with financial institutions.

Overall, the Group's funding arrangements are designed to keep an appropriate balance between equity and debt, to give financing flexibility while continuously enhancing the Group's businesses. To serve as back-up liquidity, management develops variable funding alternatives either by issuing debt or raising capital.

The table summarizes the maturity profile of the Group's financial liabilities based on contractual undiscounted payments:

Foreign currency risk

Financial assets and financing facilities extended to the Group were mainly denominated in Philippine Pesos. As such, the Group's foreign currency risk is very minimal.

The Group's foreign currency-denominated financial instruments are included in cash and cash equivalents amounting to US\$0.23 million, US\$0.26 million and US\$0.23 million in December 31, 2011, 2010 and January 1, 2010, respectively. The Philippine peso value of these instruments amounted to P 10.08 million and P11.92 million as at December 31 2011 and 2010 and January 1, 2010, respectively.

In translating the foreign currency-denominated monetary assets and liabilities into peso amounts, the exchange rates used were P43.84 to US\$1.00, P43.84 to US\$1.00 and P46.20 to US\$1.00, the Philippine peso-U.S. dollar exchange rates as at December 31, 2011, 2010 and January 1, 2010, respectively.

The following table demonstrates the sensitivity to a reasonably possible change in the Philippine peso-US dollar exchange rate, with all variables held constant, of the Group's income before tax (due to changes in the fair value of monetary assets and liabilities) on December 31, 2010, and 2008. There is no other impact on the Group's equity other than those already affecting the consolidated statements of comprehensive income.

Interest rate risk

The Group's interest rate exposure management policy centers on reducing the Group's overall interest expense and exposure to changes in interest rates. Changes in market interest rates relate primarily to the Group's interest-bearing debt obligations with floating interest rate as it can cause a change in the amount of interest payments.

The Group manages its interest rate risk by leveraging on its premier credit rating and maintaining a debt portfolio mix of both fixed and floating interest rates. The portfolio mix is a function of historical, current trend and outlook of interest rates, volatility of short-term interest rates, the steepness of the yield curve and degree of variability of cash flows.

The following table demonstrates the sensitivity to a reasonably possible change in interest rates, with all variables held constant, of the Group's income before tax (through the impact on floating rate borrowings).

	Increase (decrease) in income before tax			
	Dece	January 1, 2010		
Change in basis points	in basis points 2011			
₽1.00	(₽817,461,000)	(₽485,465,732)	(₽176,876,732)	
(1.00)	817,461,000	485,465,732	176,876,732	

The Group follows a prudent policy in managing its assets and liabilities so as to ensure that exposure to fluctuation in interest rates are kept within acceptable limits.

27. Lease Commitment

The Group as a lessee

The Group started leasing land for its mall and gasoline station in 2005. The operating lease agreement is for a period of 10 years. The Group also leases its office space under an operating lease agreement for 2 years renewable under certain terms and conditions. The Group's rentals incurred on this lease, presented as "Overhead" and included in the cost of goods sold account, amounted to P27.85 million, P 25.96 million and P29.21 million in December 31, 2011 and 2010 and January 1, 2010, respectively (see Note 21).

As of December 31, 2011 and 2010 and January 1, 2010, the future minimum rental payments are as follows:

		December 31	January 1,
		2010	2010

	₽43,646,664	₽308,858,610	₽332,418,078

The Group as a lessor

The Group also leases its mall to different parties. The lease term ranges from 5 to 10 years. The Group's rental income on these leases amounted to P238.00 million, P173.61 million and P153.41 million in 2011, 2010 and 2009, respectively (see Note 9).

As of December 31, 2011, 2010 and 2009, the future minimum receipts from these lease commitments are as follows:

28. Business Combinations

2011

Common control business combination

On October 03, 2011, East West Investment Ltd. (EIL), Great Co. Limited (GCL) and Titan Resources Corporation (TRC) (collectively referred herein as "Seller") and Fed Land entered into a deed of sale agreement to transfer its respective shares of stock held over HLRDC for a total consideration of P420.00 million.

Equivalent number of shares transferred is detailed below:

	Number of Shares
	Transferred
East West (EIL)	200,000
Great Co. (GCL)	200,000
Titan Resources (TRC)	3,600,000

On June 23, 2011, Fed Land subscribed additional common shares issued by CRDC of 400,000 common shares obtaining an effective interest of 75.8% over CRDC after issuance. Before the acquisition, CRDC was majority owned by City Tower Realty Corporation (CTRC) which resulted to a dilution of its shares to Fed Land.

The two acquisitions were accounted for using the uniting of interest method and accordingly, the December 31, 2010 and December 31, 2009 comparatives were restated to reflect the following changes in consolidated balances as of December 31, 2010 and January 1, 2010:

	Increase due to uniting of:			
Total assets	2,362,397,880	530,083,728		
Total liabilities	1,808,717,040	522,535,734		
Total revenue	135,503,171	4,475,619		
Total costs and expenses	25,539,444	2,981,516		
Net income	103,336,030	974,367		

The net assets of HLRC and CRDC as of December 31, 2010 and 2009 were pooled to the Group's financial statements as at January 1, 2011 and 2010 presented in the statement of changes in equity at the earliest period presented of January 1, 2010 as "Effect of uniting of interest" (see Note 19).

2009 Acquisitions

PCRDC

In September 2009, the Fed Land acquired 100% interest of PCRDC from an affiliated company for a consideration of P102.00 million. Said acquisition was accounted for using the interest method and accordingly, the 2008 comparatives were restated to reflect the following changes in consolidated balances as of December 31, 2008:

	Increase in:
Total assets	₽1,339,584,611
Total liabilities	1,223,653,727
Total revenue	34,547,359
Total costs and expenses	30,907,933
Net income	2,365,751

PCRDC's equity at the time of the combination, amounted to P115.93million as of December 31, 2008 and P113.56 million for the year ended January 1, 2008, are already pooled and effected in 2009.

FBRI

In 2009, the Fed Land acquired 4.47% equity interest of FBRI from Toyota Manila Bay for a total consideration of P5.16 million. Consequently, Fed Land's equity interest in FBRI has increased from 47.19% to 51.66%. The entire difference between the acquisition cost and non-controlling interest in net assets acquired amounting to P0.42 million is treated as an equity transaction and presented separately in the consolidated statement of changes in equity.

29. Basic/Diluted Earnings Per Share

The basic/diluted earnings per share amounts for the years ended December 31, 2011, 2010 and January 1, 2010 were computed as follows:

	December 31		January 1,	
	2011	2010	2010	
Net income attributable to				
Parent Company	₽3,324,399,379	₽3,001,620,966	₽2,183,991,521

	₽26.60	₽24.01	₽17.47	

Basic and diluted earnings per share are the same due to the absence of dilutive potential common shares.

30. Operating Segments

Segment Information

For management purposes, the Group is organized into business units based on their products and activities and has four reportable segments as follows:

- Real estate segment is engaged in real estate and leasing, development and selling of properties of every kind and description
- Financial institutions are engaged in the banking and insurance industry
- Motor segment is engaged in the assembly, manufacture, importation, sale and distribution of all kinds of automobiles including automobile parts, accessories, and instruments.
- Other segments have been aggregated to form a reportable segment are engaged in the following business:
 - a) trading of goods such as petroleum, non-fuel products on wholesale or retail basis, maintains a petroleum service station and
 - b) engaged in the food and restaurant service
 - c) to act as a marketing agent for and in behalf of any real estate development company or companies.

The chief operating decision maker (CODM) monitors the operating results of the Group for making decisions about resource allocation and performance assessment. Segment performance is evaluated based on revenue, operating profit and pretax income which are measured similarly in the consolidated financial statements.

Transfer prices between operating segments are on arm's length basis in a manner similar to third parties.

31. Events after Financial Reporting Date

Acquisition of GBPC

On December 20, 2011, GBPC filed an application for the increase in its authorized capital stock and reduction in the par value of its common shares to P1 per share. Upon application of increase in authorized capital stock, the Parent Company intends to convert the deposit for future stocks subscription (DFS) through issuance of new common shares by GBPC. As a result, Parent Company's direct interest will be 21.04% with equivalent subscription of 117,067,800 new common shares (see Note 8). These advances are carried at cost and did not apply equity method of accounting due to pending regulatory approval as of December 31, 2011.

On January 16, 2012, the SEC approved the application of the increase in authorized capital stock of GBPC.

On February 15 and 16, 2012, the Parent Company entered into a Deed of Absolute Sale with GBHI for the sale and transfer of 35,504,900 and 38,863,000 common shares of GBPC, respectively, with GBHI as the seller and the Parent Company as the buyer for a consideration amounting to P1.24 billion and P1.36 billion, respectively. Such shares aggregating to 74,367,900 common shares represent 13.37 % direct interest of the Parent Company over GBPC.

With the result of foregoing transaction, the Parent Company has an effective interest of 46.41% which accounted from the direct interest obtained of 34.41% plus indirect interest through FMIC, majority owned subsidiary by MBTC of 12.00%. The Group will account the transaction under purchase accounting method.

On February 9, 2012, cash dividends from Phil AXA amounting to P157.56 million were received.

Fed Land and MHC Omnibus Agreement

Fed Land, together with ORIX, executed a memorandum of agreement (MOA) dated December 8, 2011 and an Omnibus Subscription Agreement (OSA) dated December 21, 2011.

Under the MOA, Fed Land shall make additional capital contributions in the form of cash and property and ORIX shall make capital contributions in the form of cash in exchange for shares of stock of MHC pursuant to the terms and conditions set forth in the Omnibus Subscription Agreement; Orix contributions shall be placed in an escrow account until increase in subscription has been finally made.

Fed Land and Orix intends to (i) develop a residential condominium and a hotel/retail/ office building on two (2) parcels of land located in Bonifacio Global City, Fort Bonifacio, Taguig City, Metro Manila, Philippines , with an aggregate area of 12,984 square meters, and (ii) engage in the operations of the hotel.

Fed Land intends to transfer a certain parcel of land as full payment for its subscription of 12,074,800 MHC's common shares. As of December 31, 2011, title to land was not yet been transferred to MHC, thus, the transaction was not yet consummated and therefore, there is no dilution of interest of the Group as of December 31, 2011.

On January 31, 2012, the Escrow has been released resulting to the increase in deposit for future subscription and APIC of MHC by \$307.15 million and \$44.76 million.
